How to Add Mashups

- Mashups are web pages or applications that combine data from two or more sources to create a new service. Examples of mashups are Flickr Photo, YouTube, and SlideShare.
- Mashups can be added to a Learning Module or Content Area.

1. Click on **Course Content** and then select the **week** where you are adding the mashup.

2. We will add a YouTube video in this example.
3. Click on **Build Content** and under **Mashups** click on **YouTube Video**.
4. Enter search term(s) and click **Go**.
5. For each item, you can click the **Preview** button and begin viewing the video.
6. Click **Select** to add a video to your course.
How to Add Mashups

7. The Edit menu appears and you can add items such as **Name** and **Description**. You can also set the **Options**, such as showing the URL and tracking the number of views.

8. When you are done, click **Submit**.
