Big Library changes are coming!

Librarians and staff across the state are hard at work configuring and preparing a new library system...

What you can expect:

- A new discover (search) system that searches books, electronic resources, and journal articles all at once!
- A unified database to search for resources at all state universities, community colleges, and Connecticut State Library.
- Ability to request delivery of any available item in the CSCU system, or go visit to pick up!

When you can expect it:

GO LIVE is January 9, 2017!

For more information, visit the project web site at:
