Large Animal Care

CRN# 33220
Instructor: Susan Stevens-Blackshear

Students will learn how to assist the Veterinarian in caring for horses, cattle and other large domestic animals through lectures. Topics covered include agribusiness, animal husbandry, anatomy, and physical examinations. Students will learn basic restraints, vaccination protocols, parasitology, hoof care and dentistry. This course will also review the treatment of common diseases, emergencies, and nursing care of large animals.

Days: Fridays
Dates: 9/15/17-12/8/17
Registration deadline-9/8/17
No class 11/24
Times: 4:00pm-6:00pm
Room: B120
Tuition Cost: $400 – textbooks at an additional expense
CEUs: 2.4

Registrations received after the deadline date may cause a delay in students receiving or purchasing textbooks in time for course start date.

REFUND POLICY

Refund policy: Withdrawal from any non-credit class must be submitted in writing to the Workforce & Community Education office up to one business day prior to the first class. Absolutely no refunds will be issued after the first class has begun. The college reserves the right to cancel any course for which there is insufficient enrollment. In that event, a full refund will be issued.
Prerequisites for all Veterinary courses:

- Must successfully complete our in-house English and mathematics exam or provide proof of prior college level English and math. (Call our main office at 860-215-9028 to schedule time to take the test).
- Student must be able to lift up to 40 lbs. unassisted and greater than 40 lbs. with assistance.
- If you have physical limitations, please speak with your doctor before registering for class.

Veterinary Assisting I

CRN# 33219
Instructors: Katie Hanks and Susan Stevens-Blackshear

Students will learn the fundamentals needed to work as a veterinary assistant and be part of the animal health care team in a hands-on and in-depth classroom setting. The course will cover the basics in restraint, client communication, vaccination protocols, common diseases, pharmacology, and office management radiology and laboratory skills. Students will also learn about animal behavior and development along with feeding and nutrition. Students are required to purchase and wear blue scrubs for class.
