What is an EKG Technician?

EKG Technicians are responsible for performing electrocardiogram tests in order to monitor and record electrical impulses transmitted by the heart. These tests include basic EKGs, Holter Monitoring (portable EKG which records activity for 24-48 hours.), 12-lead placement and Stress Tests (treadmill). They assist a physician in diagnosing and treating cardiac and blood vessel irregularities.

CT Department of Labor has projected EKG Technicians will have a growth rate of nearly 14% from 2012-2022.

Certification

This course prepares you to take the National Certification Exam. Exam details will be provided by the instructor.

Knowledge and Competency

This course will include important practice and background information on the following:

- Anatomy and physiology of the heart
- Medical disease processes
- Medical terminology
- Medical ethics
- Legal aspects of patient contact
- The Holter monitor
- Electrocardiography
- Echocardiography

Additionally, students will practice with equipment and perform hands-on labs including introduction to the function and proper use of the EKG machine, the normal anatomy of the chest wall for proper lead placement, 12-lead placement, and other clinical practices. EKG Technicians also analyze printed readings of EKG tests, measuring various “cardiac intervals and complexes” and determining normal vs. abnormal EKG.

Course Prerequisites:

- ◇ Must be at least **18 years of age**
- ◇ Must provide proof of **high school completion (or equivalent)**
- * *Foreign students must provide a notarized English translated transcript*
