5.0 Spill or Leak Procedures

Procedures if Material is Spilled:

- Remove sources of heat or ignition, provide adequate ventilation, contain leak.
- *Small Spills:* Absorb with suitable material such as rags, straw or sand.
- *Large Spills:* Contain spill in earthen dikes for later recovery.
- Report spills as required to appropriate authorities.

Waste Disposal:

- It is the responsibility of the user to determine if the material is a hazardous waste at the time of disposal.
- Check before disposing to be sure you are in compliance with all applicable laws and regulations.
- Chemtrec/RCRA Emergency Hotline Number: 800-424-9346.

Protective Measures During Repair and Maintenance of Contaminated Equipment:

- Refer to Section VII - Special Protection Information.
- Avoid prolonged contact with oil.
- Wash exposed skin thoroughly with soap and water.
- Remove soiled clothing.
- Use polymer gloves if extended, direct contact is expected.

Toxicity Summary: Slightly toxic on ingestion. Lethal dose for 150 lb. human adult may be 10 to 250 ml.

Major Route(s) of Entry: Inhalation of incidental mists or vapors.

Acute Exposure Symptoms

<i>Inhalation:</i>	Low risk of inhalation. In enclosed spaces or when hot, vapors may reach concentrations sufficient to cause drowsiness, dizziness, headache, nausea, or lung irritation. Mists above TLV may cause chemical pneumonitis.
<i>Dermal Contact:</i>	Mild temporary irritant.
<i>Eye Contact:</i>	Mild temporary irritant.
<i>Ingestion:</i>	Toxicity is relatively low. On ingestion of large quantities, slight GI discomfort, diarrhea, and headache may occur. Small doses may produce irritation and diarrhea.
<i>Injection:</i>	Subcutaneous or intramuscular injection should be considered as a medical emergency.

Chronic Exposure

Prolonged and/or frequent dermal contact may cause drying, cracking (dermatitis) or folliculitis and some components may be absorbed. Chronic inhalation of high vapor concentrations above the TLV may have neurotoxic or myelotoxic effects.

Other Special Effects

None expected.

Medical Conditions Aggravated by Exposure

None.

First Aid and Emergency Procedures for Acute Effect

<i>Inhalation:</i>	Remove to fresh air. Respiratory support, if necessary. Seek medical aid.
<i>Dermal:</i>	Wash with soap and water. Do not wear heavily contaminated clothing before laundering.
<i>Eyes:</i>	Flush with large volumes of water. Seek physician if any complications arise.
<i>Ingestion:</i>	Do not induce vomiting. Seek medical aid.
<i>Injection:</i>	Subcutaneous injection is a medical emergency. Seek medical aid immediately.

Notes to Physician: Following ingestion at a Saybolt viscosity of about 330 SUS (100°F), there still exists some risk of aspiration into the lungs. Removal by cuffed tube lavage may be considered. Aspirated material may cause chemical pneumonitis or lipoid pneumonia. Subcutaneous or intramuscular injection requires prompt surgical debridement. If not familiar with technique, seek skilled advice.
