

CONNECTICUT COMMUNITY COLLEGES NURSING PROGRAMS

*Capital Community College, Gateway Community College, Naugatuck Valley Community College,
Northwestern CT Community College, Norwalk Community College, Three Rivers Community College*

NUR 103: PHARMACOLOGY FOR FAMILIES ACROSS THE LIFESPAN

Course Prerequisite

NUR*101: Introduction to Nursing Practice; BIO*235: Microbiology; PSY 111: General Psychology

Course Corequisite

NUR*102: Family Health Nursing; PSY*201: Life Span; SOC* 101: Principles of Sociology

Course Components

Credits 1 credit
Hours Classroom: 15 hours

Course Description

The student will focus on the safe use, pharmacological principles, indications and nursing implications related to drug therapy when caring for individuals and families. Emphasis will be placed on medications used with perinatal, neonatal, pediatric, geriatric and peri-operative clients. The course will stress the general characteristics of selected medications and will include indications, pharmacokinetics, side effects, adverse effects, contraindications, administration, nursing implications across the lifespan, client education and relationship to prior learning.

Course Student Learning Outcomes (SLOs)

At the completion of this course, the student will be able to:

1. Integrate pharmacological principles as they relate to holistic and clinical medication application when caring for a client with obstetrical, geriatric, pediatric, psychiatric, peri-operative, gynecological, genitourinary, and orthopedic conditions.
2. Apply the nursing process to drug theory as it relates to clients with obstetrical, geriatric, pediatric, psychiatric, peri-operative, gynecological, genitourinary, and orthopedic conditions.
3. Describe safe and competent medication administration as it relates to clients with obstetrical, pediatric, geriatric, psychiatric, peri-operative, gynecological, genitourinary, and orthopedic conditions.
4. Develop a comprehensive pharmacological teaching plan for clients with obstetrical, pediatric, geriatric, psychiatric, peri-operative, gynecological, genitourinary, and /or orthopedic conditions.
5. Interpret cultural and individual awareness when tailoring drug therapy to clients with obstetrical, pediatric, geriatric, psychiatric, peri-operative, gynecological, genitourinary, and orthopedic conditions.
6. Differentiate the roles of the multidisciplinary health team members when implementing a pharmacological plan of care for clients with obstetrical, pediatric, geriatric, psychiatric, peri-operative, gynecological, genitourinary, and orthopedic conditions
7. Analyze the legal-ethical implications of medication administration related to clients with obstetrical, pediatric, geriatric, psychiatric, peri-operative, gynecological, genitourinary, and orthopedic conditions.
8. Examine the professional role of the nurse in medication administration for clients with obstetrical, pediatric, child/adolescence psychiatric, pre-post operative, gynecological, genitourinary, or orthopedic conditions.

Formatted: Left

Welcome to the course:

I hope you will enjoy the freedom of taking a course on line. While online classes free you from the schedule of the classroom, it requires self-discipline to complete the readings and learning activities. It is imperative that

REV April 2015_PME, Village, 15 h independent learning/45h minimum allotted

http://www.abhes.org/assets/uploads/files/2011-02-224d6410418ac2dCalculating_Credit_Hours_in_Online_&_Blended_Learning.pdf

you keep up with the weekly modules. **Please take some time to thoroughly read the syllabus.** Another secret to success in e-learning is to keep in touch with the instructor. Do not hesitate to contact the course coordinator with questions through messaging within the course. For questions other students might be interested in- there is a Course Question section in the Discussion Section. I am also available to you on campus during posted office hours. Please feel free to contact me at any time via email. It will be checked frequently, and will make every effort to respond within 48 hours, but, would like to reserve Sunday as a day off.

Please note any late assignments will not accept. If the assignment is late, you will get scored as 0. It is expected all students will submit their assignments responses through the Blackboard. Work submitted after 23:59 on the due date is late. ALL PAPERS MUST BE SUBMITTED PRIOR TO THE DEADLINE. Don't wait until the last minute only to find that your email isn't working or your computer has crashed! **We hope this will be a valuable and enjoyable learning experience for you.**

Faculty:

Cynthia ArpinAnne Lamondy, MSN, RN, Assistant Professor
Course Coordinator
alamondy@tree.commmnet.educarpin@threerivers.edu
Office: C218
Phone & Voicemail: 860-215-94659447

Formatted: Default Paragraph Font

Nursing Lab Tutors:

Sue Turner, MSN, RN Educational Assistant
Office Phone: 860-215-3625
E-mail: 20

Faculty / Staff Availability

Students are encouraged to seek clarification with the course coordinator as needed. Students are also encouraged to seek advisement with faculty as needed. Scheduled faculty office hours are posted outside faculty offices. Students may also meet with faculty by appointment. All faculty look forward to your success. Please utilize your time wisely.

Study Groups

Students are encouraged to form study groups which can meet in the lab or at the groups' mutual location choice to review module content.

Methods of Instruction

Teaching modalities include on-line modules, power point, and case studies, medication teaching plans. Computerized programmed instruction and interactive learning tools are also used. Blackboard is used as the learning management tool.

Required Textbooks: (textbooks are used in subsequent courses)

1. ATI RN Pharmacology for Nursing (6.0 edition) ATI Nursing 2013- This is available online from ATI
Copies of this text will be provided to students.
2. A current drug handbook

REV August 2017April 2015 PME, Village

Recommended Text

1. Lehne, Pharmacology for Nursing Care, with CD (8th edition) Saunders, 2013 .

Methods of Evaluation:

Evaluation in Nursing 103 is via a one hundred (100) point grading system.

Introduction 1 x 20 = 20

Discussion ~~Boards~~ ~~5~~ Boards 5 x ~~5~~ 50 pts each = 250

“The Village” ~~activities~~ ~~6~~ activities 6 x 50 pts each = 300

Drills/case studies/quizzes 11 x 30 pts each = 330

Medication teaching plan 1 x 100 pts = 100

See Gradeable activities in each module for assignments for that unit.

Discussion boards will be graded based on a rubric, should be about 250-300 words using APA format,

When completing a discussion board please bear in mind quality of the response is of greater importance than quantity. In order to get credit you must complete your post by 23:59 on ~~Friday~~ Thursday.

Note: Questions pertaining to pertinent medications will be on the N102 exams.

To pass Nursing 103 a student must earn at least a 74 average in the course and complete the medication teaching plan.

Medication Teaching Plan Assignment Submit the teaching plan found in the “assignment” section. Teaching plans are graded using the rubric listed on Blackboard. Due date: Friday, 11/17/173/18/16 @ 2359.

The teaching plan will be further explained at the start of the semester.

Grading Policies

To pass Nursing 103 and progress in the nursing program a student must:

- Earn at least a 74 average in the course and submit a written teaching plan..
- The Grading Formula for course:
- A 930-1000
- A- 900-920
- B+ ~~87~~ 870-890
- B 830-860
- B- ~~80~~ 800-820
- C+ 770-790
- C 740-760

- D+ 670-690

- D 640-660

- F 0-630

Please Note: Grades will be computed to the second decimal point and at the end of the course will be rounded once to a whole number for the course grade. A grade at or above .50 will be rounded up to the next whole number; any grade at or below .49 will be rounded down to the whole number. See CT-CCNP handbook.

Nursing Program Policy Handbook

Refer to the Nursing Program Policy Handbook for information regarding:

Attendance Policy

Students are expected to log on, complete work and participate in the course each week. It is the student's responsibility to notify the instructor if they are not able to log on. Instructor will track student participation in the course.

Statement on Penalty for Academic Dishonesty or Plagiarism

Plagiarism is the **unacknowledged** use of another person's words or ideas in your writing. Whether conscious or not, plagiarism is a serious offense. Evidence that you did not write material that you submit under your name can result in failure for the entire course. Refer to the current College catalog for policy. Students are expected to: "Demonstrate academic integrity by not engaging in conduct that has as its intent or effect the false representation of a student's academic performance, including but not limited to: (a) cheating on an examination; (b) collaborating with others in work to be presented, contrary to the stated rules of the course; (c) plagiarizing, including the submission of others' ideas or papers (whether purchased, borrowed or otherwise obtained) as one's own; (d) stealing or having unauthorized access to examination or course materials; (e) falsifying records or laboratory or other data; (f) submitting, if contrary to the rules of a course, work previously presented in another course; and (g) knowingly assisting another student in any of the above, including an arrangement whereby any work, classroom performance, examination, or other activity is submitted or performed by a person other than the student under whose name the work is submitted or performed." Consequences are delineated in the College Catalog.

Digication Policy

As a student, you will maintain an online learning portfolio using a TRCC designed template. Through this electronic tool, you can see your own growth in college-wide learning. It may even help you to find the major that is a match to you. You can keep this Digication account after graduation, too. A Three Rivers General Education Assessment Team will select random works and review them so that we can improve the college experience for all. Your name will not be attached to any of the assessment work; it is private. This tool will also be a "place" where you can connect your learning from the classroom, school, and life. Sometimes when you look at all of the work you have done and think about it, you learn something else. In Digication, you will be able to make other portfolios, too. It's like a file cabinet with the ability to have multiple but separate files. What is exciting about the electronic tool is when you look inside you will see you are developing in new ways! Look at your class outline to see what assignments to post into the TRCC Template; you may post your own choices, too. Have fun in learning!

Formatted: Normal, No bullets or numbering

Additional Expected Activity Requirements

Students are expected to participate in class discussions board (please be mindful of net-etiquette), material review and lab practice. Participation enhances the learning experience and allows students and instructors the opportunity to learn from each other.

Students are reminded that classroom demeanor is a vital part of participation. Students should behave appropriately at all times and are asked to practice common courtesy, recognizing each person's right to learn in an atmosphere conducive to the learning experience. Students who violate the rules of courtesy and/or professional demeanor will be asked to leave.

Students are required to attend all class "meetings". Lack of participation will have a direct impact on student learning.

WITHDRAWAL POLICY:

Students may withdraw, in writing, at the Registrar's Office for any reason. Refer to the Nursing and College Student Handbooks and College Catalog. Students who receive an overall unsatisfactory clinical grade at any time in the rotation will fail this course and receive a grade of F. This course does not offer midterm theoretical warning grades. Students with concerns about their course average are encouraged to contact the course coordinator.

DISABILITIES STATEMENT:

If you have a hidden or visible disability which may require classroom or test-taking modifications, please see the course coordinator as soon as possible. If you have not already done so, please be sure to register with Chris Scarborough if you have a learning disability, ADD or ADHD, or Student Services for other physical disabilities. Please see the Three Rivers Community College Catalog for additional policies and information.
