

Human Anatomy and Physiology II / BIO K212

Instructor: Pamela Dolan

Office Hours: Tu/Th 5:30-6:30, D205
Other hours as needed, by appointment only.

Contact Info: email: PDolan@trcc.commnet.edu

Required Text(s): (1) ***Fundamentals of Anatomy and Physiology***, Frederic H. Martini, 10th edition, Prentice Hall Publisher.
(2) *Human Anatomy & Physiology I Laboratory Exercises Manual*

Other required materials

Dissecting kit, Non-latex disposable gloves, Lab coat (Landau 3178, recommended model) & Safety goggles.

Description of the Course:

Catalogue Description: A continuation of BIO 211, Human A&P I. The following systems will be covered: endocrine, digestive including nutrition, circulatory, lymphatic, respiratory, urinary including fluids and electrolytes, and reproductive. Human development and topics in human genetics will also be covered. Prerequisite(s): BIO 211 Human A&P I with a C grade or higher. This is a two-semester course in order to receive knowledge of all of the systems of the human body, students are obligated to complete both semesters of Human Anatomy & Physiology.

General Course Objectives:

- 1) To aid the student in developing an understanding of the life processes as related to humans.
- 2) To aid the student in developing an understanding of the normal structures and functions of the human body.
- 3) To provide a useful body of knowledge for studying biology, nursing and other allied health science areas.

Class Attendance Policy:

Attendance to all lectures and labs is expected. Absences are counted from the first meeting of class. More than four consecutive or more than six accumulative absences could result in student receiving a "F" grade in this course. An explanation of the cause of all absences should be given to your instructor.

Academic and Classroom Misconduct:

The instructor has primary responsibility for control over classroom and/or laboratory behavior and maintenance of academic integrity, and can request the temporary removal or exclusion from the classroom or laboratory of any student engaged in conduct that violated the general rules and regulations of the institution. Or any student engaged in conduct deemed hazardous in the laboratory. Extended or permanent exclusion from lecture or laboratory activities or further disciplinary action can only be effected through appropriate procedures of the institution.

Plagiarism, cheating on quizzes or tests, or any form of academic dishonesty is strictly prohibited. Students guilty of academic dishonesty directly or indirectly will receive a zero for the exercise or quiz or test and may receive a "F" grade for the course in addition to other possible disciplinary

sanctions with may be imposed through the regular institutional procedures. Any student that believes that he or she has been erroneously accused may appeal the case through the appropriated institutional procedure if their grade was affected.

Procedure for Dropping the Course: ***College's Withdrawal Policy***

Any student who finds it necessary to discontinue this course MUST complete a withdrawal from in the Registrar's Office at the time of the withdrawal. If you can not withdraw in person, you may call the Registrar's Office and provide them with the appropriate information. Verbal withdrawals are not acceptable. Students may withdraw from the course at any time up to the withdrawal deadline, which is May 8th, 2017. Students who do not officially withdraw but stop attending class will be assigned an "F" grade for the course. **Once a student withdraws from class he/she is no longer eligible to take any remaining quizzes or tests.**

Tests:

There will be twelve scheduled quizzes. All quizzes are given during the first ten minutes of class. Quiz material will come from the previous class' lecture material as well as reading assignments pertaining to that week's lecture. I will post reading assignments on Blackboard. (No make-ups for quizzes). The three lowest quiz grades will be dropped. Four unit tests, three lab tests and a comprehensive final exam will also be given. Unit tests are scheduled in advance and will be reviewed before the final exam is given.

Grade Determination:

Your semester grade is based out of 800 points. 390 of the 800 come from lecture quizzes & tests, 210 come from lab, and 200 come from the comprehensive final exam. There are no "extra credit" assignments given. EVER.

Point Distribution

Item	Possible Point total
12 weekly chapter quizzes each worth 10 points (the 3 lowest will be dropped)	90 points
4 Unit Tests (75 points each)	300 points
3 laboratory practical's (70 points each)	210 points
Cumulative Final (200 questions)	200 points
Semester total	800 points

The point based grading system allows you to know your grade at all points through the semester. To calculate your grade, you divide the number of points you have earned from the total available points up to that point. For example, let's say you have had 6 quizzes, 1 practical and 1-unit test. Your scores on them are: 8, 7, 6, 8, 7, 8, for quizzes, 60 on the practical, and 78 on test 1. Your total point accumulation is 182. The total available points up to that moment is 230. You divide your earned points by the total available.

$$182/230 = .7913 \times 100 = 79.13 = C+$$

Grade Scale: There will be NO grading on the normal distribution curve.

100.00 – 94.50	= A
94.49 – 90.00	= A-
89.99 – 87.50	= B+
87.49 – 84.50	= B
84.49 – 79.50	= B-
79.49 – 77.50	= C+
77.49 – 74.50	= C
74.49 – 69.50	= C-
69.49 – 63.50	= D+
63.49 – 59.50	= D
59.49 – 55.00	= D-
54.99 – 00.00	= F

Make-up Policy

All tests, quizzes, and practical exams are scheduled in advance (see class schedule at the end of this syllabus). If a scheduling conflict occurs, come see me as early as possible to discuss the best course of action such as dropping the course or switching into another section. Vacations are not a reason to miss a scheduled test or practical exam.

Lecture: Quizzes **cannot** be made up for any reason and they **will not** be given early/late. Unit tests can be made up, but at the discretion of the instructor. Makeup tests will be granted on an individual basis only following a conference with the instructor; where the reason(s) for missing the test must be determined as mitigating circumstances beyond the control of the student such as, illness, death in the family, or change in condition of employment. All make-up tests will be scheduled at the **convenience of the instructor** (typically office hours) and **must be made up within 48 hours of the original test date and time**. Only one (1) Unit Test make-up will be allowed.

Lab: Missed laboratory exercises can be made up. If you know you will miss a lab exercise for any reason, come speak to me about attending another lab section. Lab practical's **cannot** be made-up.

Revisions to the Syllabus:

Students are responsible for learning all of the objectives and all of the items in the course outline whether they are discussed in lecture and/or laboratory or not. The instructor reserves the right to revise the objectives, topical outline, or academic schedule contained in this syllabus without notice. However, if the revisions affects scheduled unit test a 48 hour notice will be given for the new test date.

Cellular Phone Policy:

There is no texting, Snapchat, Instagram, Facebook, or etc. allowed during lecture or lab. Under no circumstance are phones to be answered in class. When there are extenuating circumstances that require a student to be available by phone, that student must speak to the instructor prior to class, so that together they can arrive at an agreement.

If a cell phone is out (this includes, but is not limited to: on desk/on lap/on floor/on desk next to you) in class or lab at any time during a quiz/test/practical it will be assumed that the student(s) are cheating and the quiz/test/practical will be handed in with a zero, with no possibility of a make-up and further disciplinary sanctions will be possible.

BOARD OF REGENTS FOR HIGHTER EDUCATION AND CONNECTICUT STATE COLLEGES AND UNIVERSITIES POLICY REGARDING SEXUAL MISCONDUCT REPORTING, SUPPORT SERVICES AND PROCESSES POLICY

Statement of Policy for Public Act No. 14-11: An Act Concerning Sexual Assault, Stalking and Intimate Partner Violence on Campus:

"The Board of Regents for Higher Education (BOR) in conjunction with the Connecticut State Colleges and Universities (CSCU) is committed to insuring that each member of every BOR governed college and university community has the opportunity to participate fully in the process of education free from acts of sexual misconduct, intimate partner violence and stalking. It is the intent of the BOR and each of its colleges or universities to provide safety, privacy and support to victims of sexual misconduct and intimate partner violence."

UNITED STATES DEPARTMENT OF EDUCATION AND OFFICE OF CIVIL RIGHTS TITLE IX STATEMENT OF POLICY:

"Title IX of the Education Amendments of 1972 (Title IX) prohibits discrimination based on sex in education programs and activities in federally funded schools at all levels. If any part of a school district or college receives any Federal funds for any purpose, all of the operations of the district or college are covered by Title IX.

Title IX protects students, employees, applicants for admission and employment, and other persons from all forms of sex discrimination, including discrimination based on gender identity or failure to conform to stereotypical notions of masculinity or femininity. All students (as well as other persons) at recipient institutions are protected by Title IX – regardless of their sex, sexual orientation, gender identity, part-or full-time status, disability, race, or national origin-in all aspects of a recipient's educational programs and activities."

If any student experiences sexual misconduct or harassment, and/or racial or ethnic discrimination on Three Rivers Community College Campus, or fears for their safety from a threat while on campus, please contact Edward A. Derr, the Diversity Officer and Title IX Coordinator: at the TRCC Admissions Welcome Center * Office A116
860.215.9255 * EDerr@trcc.commnet.edu

Digication:

All students are required to maintain an online learning portfolio in Digication that uses the college template. Through this electronic tool students will have the opportunity to monitor their own growth in college-wide learning. The student will keep his/her learning portfolio and may continue to use the Digication account after graduation. A Three Rivers General Education Assessment Team will select and review random works to improve the college experience for all. Student work reviewed for assessment purposes will not include names and all student work will remain private and anonymous

for college improvement purposes. Students will have the ability to integrate learning from the classroom, college, and life in general, which will provide additional learning opportunities. If desired, students will have the option to create multiple portfolios.

Course Outcomes: Human and Anatomy and Physiology II

1. The student will be able to compare the physiology of the endocrine system and the nervous systems using practical examples and/or practical applications.
2. The student will be able to compare the cellular components of the endocrine system with those of other tissues and systems and describe how endocrine organs are controlled.
3. The student will be able to compare the major chemical classes of hormones and describe the chemical composition of each class of hormones.
4. The student will be able to explain in detail the general mechanisms of hormonal action.
5. The student will be able to explain how hormones interact to produce coordinated physiological response.
6. The student will be able to name the major endocrine glands of the body describe their location in the body and the hormones they secrete.
7. The student will be able to identify the hormones that are especially important to normal growth, and discuss their roles.
8. The student will be able to explain the action of the hormones secreted by the various endocrine glands of the body.
9. The student will be able to discuss and give examples of both positive and negative feedback mechanisms.
10. The student will be able to describe the interrelationship of neural and hormonal control.
11. The student will be able to discuss the consequences of oversecretion and undersecretion of various hormones.
12. The student will be able to describe the effects that hormones have on behavior.
13. The student will be able to distinguish between physical and psychological stress.
14. The student will be able to describe the general stress response.
15. The student will be able to name the organs of the digestive system and give their location in the body.
16. The student will be able to describe the structure of the wall of the alimentary canal (G.I. Tract).
17. The student will be able to demonstrate knowledge of regulatory control of the nervous and endocrine systems over the alimentary canal (G.I. Tract).
18. The student will be able to describe the mixing and movements of material through the alimentary canal (G.I. Tract).
19. The student will demonstrate knowledge of the swallowing mechanism.
20. The student will demonstrate knowledge of the phases and the regulation of gastric secretion.
21. The student will demonstrate knowledge of the organs of digestion in the mouth and their role in the digestive process.

22. The student will be able to name, give the location and function of the salivary glands.
23. The student will be able to give the structural make-up and the functions of the pharynx and esophagus.
24. The student will demonstrate knowledge of the structural organization and the function of the stomach.
25. The student will demonstrate knowledge of the structure and function of the small and large intestines.
26. The student will demonstrate knowledge of the structure and function of the pancreas.
27. The student will demonstrate knowledge of the structure and function of the liver.
28. The student will be able to list the enzymes secreted by the various digestive glands or organs and describe the function of each.
29. The student will demonstrate knowledge of the hydrolysis of carbohydrates, neutral fats, and proteins.
30. The student will be able to explain how the products of digestion are absorbed.
31. The student will acquire knowledge of some common disorders of the digestive system.
32. The student will be able to define and explain: nutrition, nutrients, and essential nutrients.
33. The student will demonstrate knowledge of the basic food groups and their major sources.
34. The student will be able to explain how carbohydrates, lipids, proteins, and amino acids are utilized by the cells.
35. The student will be able to name the major vitamins needed by the body, give their chemical make up and describe the general function of each.
36. The student will be able to explain the consequences of vitamin deficiencies.
37. The student will be able to name and describe the general functions of the major minerals and trace elements essential to man.
38. The student will demonstrate knowledge of basic metabolism and temperature regulation.
39. The student will demonstrate knowledge of the composition and functions of the blood.
40. The student will be able to distinguish between the various types of cells found in blood.
41. The student will be able to list the major components of blood plasma and give their functions.
42. The student will be able to explain the formation of blood cells and how it is controlled.
43. The student will demonstrate knowledge of the clotting mechanism of blood.
44. The student will be able to explain the basis for blood typing and the methods used to avoid adverse reaction following blood transfusion.
45. The student will be able to describe how blood reaction may occur between fetal and maternal tissues and how such reaction can be prevented.
46. The student will demonstrate knowledge of the heart and blood vessels both structurally and functionally.
47. The student will be able to describe the cardiac conduction system.
48. The student will demonstrate knowledge of the cardiac cycle and the ECG.
49. The student will demonstrate knowledge of the regulation of heart function and blood pressure.
50. The student will demonstrate knowledge of the division of the circulatory system (circulatory circuits).
51. The student will be able to identify and describe the location of the major arteries and veins of the human body in both the pulmonary and systemic circuits.
52. The student will demonstrate knowledge of both hepatic and renal portal systems of circulation.
53. The student will demonstrate knowledge of fetal circulation.
54. The student will be able to define cardiac arrhythmia and describe several forms for arrhythmia.
55. The student will demonstrate knowledge of some disorders of the blood/cardiovascular system.

56. The student will demonstrate knowledge of the structure and function of the lymphatic vessels, nodes, and associated organs.
57. The student will demonstrate knowledge of the composition and circulation of lymphatic fluid.
58. The student will be able to distinguish between specific and nonspecific body defenses and provide an example for each.
59. The student will be able to demonstrate and/or explain how lymphocytes are formed and their role in the immune mechanisms.
60. The student will be able to name the major types of immunoglobulins and discuss their functions.
61. The student will be able to distinguish between primary and secondary immune responses as well as active and passive immunity.
62. The student will be able to explain how allergic reactions and tissue rejection reaction are related to the immune response.
63. The student will demonstrate knowledge of the structure and function of the organs of the respiratory systems and air passageways.
64. The student will demonstrate knowledge of the respiratory musculature and pressure changes produced by their action.
65. The student will demonstrate knowledge of physical and chemical changes associated with oxygen and carbon dioxide transport.
66. The student will demonstrate knowledge of the respiratory volumes and exchanges.
67. The student will demonstrate knowledge of the phases of the respiratory process.
68. The student will review the major events that occur during cellular respiration and explain how oxygen is utilized by cells.
69. The student will demonstrate knowledge of the mechanisms of regulation the respiratory system.
70. The student will demonstrate knowledge of some common physiological modification of the respiratory process.
71. The student will become familiar with some common respiratory disorders and their effect on the respiratory process.
72. The student will demonstrate knowledge of the structure, location, and functions of the kidneys.
73. The student will demonstrate knowledge of the structures, locations, and functions of the ureters, the bladder, and the urethra.
74. The student will be able to trace the pathway of blood through the renal portal system.
75. The student will demonstrate knowledge of the kidney tissues.
76. The student will be able to describe the nephron and explain the functions of its parts.
77. The student will demonstrate knowledge of the physiology of urine formation.
78. The student will be able to explain glomerular filtration and describe the composition of the filtrate.
79. The student will be able to discuss the composition of urine.
80. The student will demonstrate knowledge of the regulation of kidney functions.
81. The student will be able to discuss the process of micturition and explain how it is controlled.
82. The student will be able to describe the distribution of body fluids into the major fluid compartments.
83. The student will be able to explain what is meant by water and electrolyte balance and discuss why it is important.
84. The student will demonstrate knowledge of the mechanisms controlling the distribution of the body's water.
85. The student will demonstrate knowledge of the mechanisms of ionic homeostasis (electrolyte homeostasis).

86. The student will demonstrate knowledge of the relationship between trauma and water distribution.
87. The student will be able to explain factors leading to water intoxication and dehydration and their effects on the water/electrolyte balance.
88. The student will be able to explain or define edema and list several causes and their effects.
89. The student will be able to understand and describe the consequences of sodium and potassium imbalance as well as imbalances in various other electrolytes in the human body.
90. The student will be able to define pH and describe the major sources of hydrogen ions.
91. The student will demonstrate knowledge of the acid-base balance and buffer system.
92. The student will be able to explain acidosis and alkalosis, conditions that cause them to occur and how they may be controlled.
93. The student will be able to state the general function of the reproductive system.
94. The student will be able to describe the process of gametogenesis (spermatogenesis and oogenesis).
95. The student will be able to describe the structure, location and function of the female reproductive anatomy.
96. The student will be able to describe the structure, location and function of the female reproductive anatomy.
97. The student will be able to describe how hormones control the activities of the female reproductive system and how they are related to the development of the female secondary sexual characteristics.
98. The student will be able to describe how hormones control the activities of the female reproductive system and how they are related to the development of the female secondary sexual characteristics.
99. The student will be able to describe the physiological changes relative to the menstrual cycle.
100. The student will be able to discuss the structure and function of the mammary glands.
101. The student will be able to explain fertilization and early embryonic development.
102. The student will be able to explain the physiological and anatomical changes experienced during pregnancy and the birth process.
103. The student will be able to discuss some common methods of contraception.
104. The student will be able to distinguish between growth and development.
105. The student will be able to describe the major events that occur during the period of cleavage.
106. The student will be able to explain how the primary germ layers originate and list the structures produced by each layer.
107. The student will be able to describe the formation and function of the placenta.
108. The student will be able to list and give the functions of the extra-embryonic membranes.
109. The student will be able to define the term fetus and discuss fetal development.
110. The student will be able to trace the general path of blood through the fetal circulatory system.
111. The student will demonstrate knowledge of the Mendelian Laws of the Genetics.
112. The student will demonstrate knowledge of the various forms of gene interaction.
113. The student will be able to describe how chromosomes control the inheritance of sex.
114. The student will be able to describe the patterns of sex-linked traits.
115. The student will be able to define nondisjunction of chromosomes and explain the genetic and/or developmental consequences.
116. The student will be able to discuss some common forms of human genetic diseases.
117. The student will be able to explain the role of DNA and RNA in inheritance.

Course Outline: Human Anatomy and Physiology II

UNIT I

1. The Endocrine System

A) Hormones

- 1) Chemistry of hormones
 - a) amines
 - b) proteins
 - c) steroids
- 2) Action of hormones – the effect they have on organs, tissues, and cells.
- 3) Control of hormonal secretions
 - a) nerve control
 - b) negative feedback mechanism
 - c) positive feedback mechanism

B) The Glands and Tissues

- 1) Pituitary, Pineal gland, Thyroid, Parathyroids, Thymus, Adrenal cortex, Adrenal medulla, Pancreas, Ovaries, Testes, Kidneys, Heart, and other specific tissues.
- 2) Anatomical locations of each gland or tissues
- 3) Histological features of each gland
- 4) Hormonal secretions and their functions of each gland or tissue
- 5) Disorders of over and under secretions of each gland or tissue

C) Stress

- 1) Types
- 2) Causes
- 3) Responses
- 4) Clinical implications

2) The Digestive System

A) Regulation of the gastrointestinal system

- 1) nerves
- 2) hormones

B) The wall structure of the alimentary canal (G.I. system)

- 1) Mucous membrane
- 2) Submucosa
- 3) Muscular layer
- 4) Serous layer

C) The mixing and movement of materials along the G.I. tract

- 1) Peristalsis

D) The organs and glands of the digestive system their structural make-up, functions, and their anatomical locations.

- 1) Mouth
 - a) cheeks and lips
 - b) tongue
 - c) palate
 - d) teeth
- 2) The salivary glands
 - a) parotids
 - b) submaxillary

- c) sublingual
- 3) The pharynx
- 4) The esophagus
- 5) The stomach
 - a) cardiac region
 - b) fundic region
 - c) the body
 - d) pyloric region
 - e) gastric glands
- 6) The pancreas
- 7) The liver
- 8) The small intestines
 - a) duodenum
 - b) jejunum
 - c) ileum
 - d) villi
 - e) lumen
 - f) intestinal glands
- 9) The large intestines
 - a) ascending colon
 - b) transverse colon
 - c) descending colon
 - d) rectum
 - e) anal canal
 - f) anus

2. Nutrition and Metabolism

- A) The basic food groups and their biological usage
 - 1) carbohydrates
 - 2) lipids
 - 3) proteins
- B) Energy requirements
 - 1) basal metabolic rate
- C) Vitamins
 - 1) kinds of vitamins and their chemical composition
 - 2) sources
 - 3) biological role
 - 4) disorders of vitamin deficiency
- D) Minerals
 - 1) essential minerals (elements)
 - 2) trace elements
 - 3) biological role of minerals
- E) Cellular Respiration
 - 1) glycolysis
 - 2) kreb's cycle or tca cycle
 - 3) electron transport or oxidative phosphorylation

UNIT II

1. The Blood/Cardiovascular System

- A) The blood
 - 1) Composition
 - a) plasma

- b) formed elements: erythrocytes (red blood cells)
leukocytes (white blood cells)
thrombocytes (platelets)
 - c) intrinsic factors
 - 2) The formation of blood cells
 - 3) Functions of blood cells
 - 4) Clotting – and the mechanism of clotting
 - 5) Typing
 - a) the ABO system
 - b) the Rh system
 - B) The cardiovascular system
 - 1) The heart
 - a) histological features
 - b) anatomical features
 - c) conduction system
 - d) the cardiac cycle and its regulation
 - e) arrhythmias
 - 2) the blood vessels, their anatomy and physiology
 - a) arteries/arterioles
 - b) capillaries
 - c) veins/ venules
 - 3) Blood pressure
 - a) systolic pressure
 - b) diastolic pressure
 - c) stroke volume
 - d) cardiac output
 - e) blood volume
 - f) control of blood pressure
 - g) factors affecting blood pressure
 - C) The circulatory circuits
 - 1) pulmonary
 - 2) systemic
 - 3) coronary
 - 4) portals (hepatic/renal)
 - D) Fetal circulation
 - E) Disorders of the cardiovascular system
- 2. Body Defense and the lymphatic system
 - A) The lymphatic system
 - 1) The basic functions of the lymphatic system
 - a) conservation of proteins
 - b) absorption of fats
 - c) immunity
 - 2) Lymph
 - a) composition
 - b) circulation
 - 3) Lymph vessels – structure and function
 - a) lymphatic capillaries (lacteals)
 - b) lymphatic vessels
 - c) lymph nodes (afferent and efferent vessels)
 - d) lymphatic trunks
 - e) collecting ducts

4) Lymphatic organs -structure and function

- a) nodes
- b) spleen
- c) thymus
- d) tonsils

B) Body defense against infections

1) Nonspecific resistance

- a) species resistance
- b) mechanical barriers
- c) chemical action
- d) interferons
- e) inflammation
- f) phagocytosis
- g) fever
- h) NK cells

2) Immunity

a) lymphocytes

- 1) T-cell system
- 2) B-cell system

b) immunoglobulins, their chemical composition, role in immunity and concentration in the plasma

- 1) IgG
- 2) IgA
- 3) IgM
- 4) IgD
- 5) IgE

3) Types of Immunity

- a) active immunity
- b) passive immunity

4) Allergies and other disorders of the immune system

3. The Respiratory System

A) The organs and passageways of the respiratory system, their structure and functions.

- 1) nose and nasal cavity
- 2) pharynx
- 3) larynx
- 4) trachea
- 5) bronchi and bronchioles
- 6) alveolar ducts and alveoli
- 7) lungs

B) The mechanism of breathing

- 1) inspiration
- 2) expiration

C) Respiratory volumes

- 1) vital capacity
- 2) tidal volume
- 3) inspiratory reserve volume
- 4) expiratory reserve volume
- 5) residual volume
- 6) total lung capacity

D) The phases of the respiratory process

- 1) breathing

- 2) external respiration
- 3) internal respiration
- 4) cellular respiration
- E) Control of breathing
 - 1) the respiratory center
 - a) pneumotaxic area
 - b) apneustic area
 - 2) Hering-Breuer reflex
 - 3) Chemical factors
- F) Some breathing disorders
 - 1) Paralysis of breathing muscle
 - 2) Bronchial asthma
 - 3) Emphysema
 - 4) Lung cancer

UNIT III

1. The Urinary System
 - A) Kidneys
 - 1) anatomical location
 - 2) structures
 - a) renal sinus
 - b) renal pelvis
 - c) renal medulla
 - d) renal cortex
 - e) hilum
 - f) the renal portal system
 - g) nephrons
 - 3) Functions
 - a) urine formation
 - b) water and electrolyte balance
 - B) Ureters
 - 1) anatomical location
 - 2) structural make-up
 - 3) function
 - C) The urinary bladder
 - 1) anatomical location
 - 2) structural make-up
 - 3) function
 - D) The Urethra
 - 1) anatomical location
 - 2) structural make-up
 - 3) function
 - E) The micturition reflex
2. Water and Electrolyte Balance
 - A) Fluid compartments
 - 1) intracellular compartment
 - 2) extracellular compartments
 - 3) transcellular compartments
 - B) The movement of fluids between compartments
 - C) Water balance

- 1) water intake
- 2) water output
- 3) regulation of water balance
- D) Electrolyte Balance
 - 1) electrolyte intake
 - 2) electrolyte output
 - 3) regulation of electrolyte balance
- E) Disorders of the water and electrolyte balance
 - 1) dehydration
 - 2) water intoxication
 - 3) edema
 - 4) sodium/potassium imbalances
 - a) hyponatremia
 - b) hypernatremia
 - c) hypokalemia
 - d) hyperkalemia
 - 5) imbalances of other electrolytes: hypo and hyper concentrations
 - a) calcium
 - b) magnesium
 - c) chlorine
 - d) phosphates
- F) pH
 - 1) pH (defined)
 - 2) sources of hydrogen ions
 - 3) regulation of hydrogen ion concentration
 - 4) acid/base buffer system
- G) Disorders of the acid/base balance
 - 1) acidosis, types and causes
 - a) respiratory acidosis
 - b) metabolic acidosis
 - 2) Alkalosis, types and causes
 - a) respiratory alkalosis
 - b) metabolic alkalosis

- 3. The reproductive system
 - A) The function of the reproductive system
 - B) Gametogenesis
 - 1) spermatogenesis
 - 2) oogenesis
 - C) The male reproductive organs
 - 1) names and anatomical location
 - 2) histology
 - 3) function
 - D) The hormones of the male reproductive and their function
 - E) The female reproductive organs
 - 1) names and anatomical location
 - 2) histology
 - 3) function
 - F) The female reproductive cycle
 - 1) menarche
 - 2) menopause
 - G) Hormonal control of the female reproductive cycle

- 1) pituitary hormones
- 2) ovarian hormones
- H) The mammary glands
 - 1) histological make-up
 - 2) secretions and the regulation of the secretions
- I) Birth control methods
- J) Some common S.T.D.'s
- K) Pregnancy
 - 1) ovulation
 - 2) fertilization
 - 3) early embryonic development

4. Human Growth and development

- A) Cleavage
 - 1) zygote
 - 2) morula
 - 3) blastula
 - 4) blastocyst
 - 5) gastrula
- B) The germ layers and their development
 - 1) ectoderm
 - 2) mesoderm
 - 3) endoderm
- C) The extra-embryonic membranes and their functions
 - 1) chorion
 - 2) amnion
 - 3) allantois
 - 4) yolk sac
- D) Fetal stage
 - 1) growth
 - 2) development
- E) Fetal circulation
- F) Postnatal period
 - 1) neonatal
 - 2) infancy
 - 3) childhood
 - 4) adolescence
 - 5) adulthood
 - 6) senescence

5. Heredity

- A) Meiosis, chromosomes, genes and heredity
- B) Mendelian inheritance
 - 1) law of segregation
 - 2) law of independent assortment
 - 3) law of dominance
 - 4) other terms
- C) Crosses
 - 1) monohybrid
 - 2) dihybrid
 - 3) probability
- D) Epistasis
- E) Gene interactions

F) Sex determining chromosomes

G) Sex linked traits

General timeline for BIO K212, A&P 2, Spring 2018

All dates are subject to revision as needed.

WEEK	DATES	TUESDAY LAB	THURSDAY LECTURE
1	1/17 - 1/19		Course Introduction, Endocrine System CH 18
2	1/22 - 1/26	<i>Lab: Mink Internal Organs and Lab: Mink Digestive System</i>	QUIZ 1 , Endocrine System CH 18, Digestive System CH 24
3	1/29 - 2/2	<i>Lab: Endocrine Renal Lab</i>	QUIZ 2 , Digestive System CH 24
4	2/5 - 2/9	<i>Lab: Blood analysis and blood cell identification</i>	UNIT TEST 1 (CH 18, 24) Blood CH 19
5	2/12 - 2/15	<i>Lab: Heart Dissection and lecture</i>	QUIZ 3 Blood CH 19
6	2/20 - 2/23	Practical 1	QUIZ 4 Heart CH 20
7	2/26 - 3/2	<i>Lab: Mink/Human blood vessels</i>	QUIZ 5 Vessels CH 21
8	3/5 - 3/9	<i>Lab: Human blood vessels and : ELISA Assay</i>	UNIT TEST 2 (CH 19 - 21) Lymph and Immunity CH 22
9	SPR BREAK	SPRING BREAK	SPRING BREAK
10	3/19 - 3/23	Practical 2	QUIZ 6 Lymph and Immunity CH 22
11	3/26 - 3/29	<i>Lab: Respiratory</i>	QUIZ 7 Respiratory System CH 23
12	4/2 - 4/6	<i>Lab: Urinalysis</i>	QUIZ 8 Respiratory CH 23/ Urinary System CH 26
13	4/9 - 4/13	<i>Lab: Heredity and Genetics</i>	UNIT TEST 3 (CH 22 - 23) Urinary CH 26
14	4/16 - 4/20	<i>Development</i>	QUIZ 9 Urinary CH 26

15	4/23 - 4/27	Practical 3	QUIZ 10 Fluid/Electrolyte Balance CH 27
16	4/30 - 5/4	QUIZ 11 Lecture: Fluid/Electrolyte Balance CH 27	UNIT TEST 4 (CH 26 - 27) Reproductive System CH 28
17	5/7 - 5/11	Reproductive CH 28 Exam Review	QUIZ 12 Exam Review
18	5/14 - 5/16	FINAL EXAM
