Suggested Text:

Lutgens, F.K. (2011). Foundations of Earth Science, 6th ed. Pearson / Prentice Hall. 476p.

Supplementary Materials

Pough, H. F. 1991. Peterson First Guide to Rocks and Minerals. Houghton Mifflin Co.

<u>Catalog Description</u>:

A study of the earth as a planet including a study of the new geology and physiography of Connecticut. Emphasis is placed on Connecticut's earthquakes, dinosaurs, and rock identification. This course is designed for liberal arts and business students desiring to meet a science requirement for a degree and for prospective teachers. Some fieldwork is involved. Three lecture hours, three laboratory hours.

Primary Objectives:

In addition to developing an understanding of earth science processes as they relate to other scientific disciplines, the student will be aided to obtain an awareness of the interdependence of physical processes and natural laws governing the earth to ensure their continuation and stability. An understanding of geosystems and the interrelationship between humans and other life forms will be developed. The student also will be encouraged to gain intuition about the earth sciences: **Astronomy;** measurements of the universe, the solar system, and light. **Meteorology;** weather & climate, temperature, humidity, pressure, and wind. **Geology;** the rock cycle, earth's substance, mineral identification, erosion, and geomorphology. **Oceanography;** hydrologic cycle, wind, waves, water circulation, and tides.

Attendance Policy:

Students are expected to attend class and laboratory sessions regularly. If a class or lab is missed due to circumstances beyond your control, **please**, be sure to notify your instructor and make the necessary arrangements for obtaining the lecture notes. **You will** be responsible for the material. If 3-4 classes (and/or 3-4 labs) are missed, a deduction of 5 POINTS will be taking from your final grade. TEN POINTS will be deducted from your final grade if 5 or more classes (and/or labs) are missed. If 100% attendance is noted, 5 points will be added to your grade.

Field Excursions – Approximately 13 field excursions are planned during lab times, if you do not wish to attend the field excursions you must report to sign in, the campus lab (A-221) for activity assignments.

Grade Evaluation:

There will be three examinations, and the final examination. Although the subject matter does tend to build on itself, the final examination is not cumulative. There will be eleven **weekly** quizzes. The lowest quiz grade will be dropped. **There will be no makeup <u>quizzes!</u>** Exam and quiz questions will consist of multiple choice and/or short answers. Two-laboratory practicals may also be included.

A systematic research paper on **ONE** of four **research projects** is also required:

- **1)** <u>Astronomical Observation Project</u>: this project includes daily-weekly observations of stellar, lunar, and solar activity.
- 2) <u>Geologic Survey of Global Seismic & Volcanic Activity Project</u> (via the Internet): this project incorporates the use of the 'World Wide Web' to monitor (current) global seismic and volcanic activity.
- **3)** <u>Atmospheric Monitoring & Weather Forecasting Project</u> (via the Internet or, newspaper): this project will include tracking storms as jet steams and fronts influence them. Collect, display, and analyze accumulated data for precipitation, temperature, dew point, and interactions between high & low-pressure systems. Predict approaching disturbances of local weather.
- **4)** <u>A Formal 5-7 page Research Paper</u>: Selections for your paper could be taken from a list of topics found within this syllabus or from your own interests.

More will be said pertaining to your paper/project through the semester. Oral presentations may also accompany research project.

*****Research Project Due Date (26 April 2018) *****

Grading:

in a dring.	
Final grade will based on the following:	
Semester Grade*	50%
Laboratory Grade [£]	25%
Research Project	20%
Class participation	05%
	-100%

*Semester grade = 40% Unit tests + 10% quizzes £Laboratory grade = 20% Lab practicals + 5% Lab reports

Final Grade:

100.0-99.0= A	79.4-77.5= C+
98.9-93.5= A	77.4-72.5= C
93.4-90.5= A-	72.4-69.5= C-
90.4-87.5= B+	69.4-63.5= D+
87.4-84.5= B	63.4-59.5= D
84.4-79.5= B-	59.4-00.0= F

College Withdrawal Policy:

A student who finds it necessary to discontinue a course once class has met must provide written notice to the registrar. Withdrawal forms are available at the Registrar's office. Students who do not withdraw, but stop attending **will receive** a grade of "F" for the final grade. **Verbal withdrawals cannot be accepted**.

Disabilities Statement:

If you have a hidden or visible disability, which may require classroom or test-taking modifications, please see me as soon as possible. If you have not already done so, please be sure to register with the college disability counselors by contacting Student Services Office.

- Matt Liscum, Counselor: (860)215-9265 (Room A-113)
 - Learning Disabilities
 - ADD/ADHD
 - o Autism Spectrum
 - o Mental Health Disabilities

- Elizabeth Willcox, Advisor: (860)215-9289 (Room A-113)
 - Medical Disabilities
 - Mobility Disabilities
 - Sensory Disibility

Statement of Policy for Public Act No. 14-11: An Act Concerning Sexual Assault, Stalking and Intimate Partner Violence on Campus:

"The Board of Regents for Higher Education (BOR) in conjunction with the Connecticut State Colleges and Universities (CSCU) is committed to insuring that each member of every BOR governed college and university community has the opportunity to participate fully in the process of education free from acts of sexual misconduct, intimate partner violence and stalking. It is the intent of the BOR and each of its colleges or universities to provide safety, privacy and support to victims of sexual misconduct and intimate partner violence."

UNITED STATES DEPARTMENT OF EDUCATION AND OFFICE OF CIVIL RIGHTS TITLE IX STATEMENT OF POLICY:

"Title IX of the Education Amendments of 1972 (Title IX) prohibits discrimination based on sex in education programs and activities in federally funded schools at all levels. If any part of a school district or college receives any Federal funds for any purpose, all of the operations of the district or college are covered by Title IX.

Title IX protects students, employees, applicants for admission and employment, and other persons from all forms of sex discrimination, including discrimination based on gender identity or failure to conform to stereotypical notions of masculinity or femininity. All students (as well as other persons) at recipient institutions are protected by Title IX – regardless of their sex, sexual orientation, gender identity, part-or full-time status, disability, race, or national origin-in all aspects of a recipient's educational programs and activities." If any student experiences sexual misconduct or harassment, and/or racial or ethnic discrimination on Three Rivers Community College Campus, or fears for their safety from a threat while on campus, please contact Vicki Baker, the Diversity Officer and Title IX Coordinator: 860-215-9208 (vbaker@trcc.commnet.edu)

Academic and Classroom Misconduct:

The instructor has the primary responsibility for control over classroom behavior and maintenance of academic integrity, and can order the temporary removal or exclusion from the classroom, and/or laboratory, of any student engaged in conduct violative of the general rules and regulation of the institution. Extended or permanent exclusion from classroom, and/or laboratory, or further disciplinary action can be effected only through appropriate college procedure. Plagiarism, cheating, or any form of academic dishonesty is **prohibited**. Students guilty of academic dishonesty directly or indirectly will receive a **zero** for an exercise or exam and may receive an **F** for the course in addition to other possible disciplinary sanctions, which maybe imposed through the regular institutional procedures. Any student that believes he or she has been erroneously accused may appeal the case through the appropriate institutional procedures if their grade was affected.

Digication:

All students are required to maintain an online learning portfolio in Digication that uses the college template. Through this electronic tool students will have the opportunity to monitor their own growth in college-wide learning. The student will keep his/her learning portfolio and may continue to use the Digication account after graduation. A Three Rivers General Education Assessment Team will select and review random works to improve the college experience for all. Student work reviewed for assessment purposes will not include names and all student work will remain private and anonymous for college improvement purposes. Students will have the ability to integrate learning from the classroom, college, and life in general, which will provide additional learning opportunities. If desired, students will have the option to create multiple portfolios.

Tentative Spring 2018 EAS K110 Laboratory Activities

- **1)** Planetary system replication
- 2) Earth-Moon-Sun interactions
- 3) Global time zones: International date line & prime meridian
- 4) Dew point & Relative humidity: Use of a sling psychrometer
- 5) Heat transfers: Conduction and Convection
- 6) Mineral formation
- 7) Mineral identification
- 8) Rock identification
- 9) The dynamic ocean floor
- **10)** Plate tectonics
- **11)** Effects of glaciers & morainal formation
- **12)** Expressing topography on a map
- 13) Reading geologic maps & Integrating geological concepts
- 14) Geologic Time Scale & Fossil lab

Possible Field Excursions

- 1) Mystic Seaport Planetarium (Mystic, CT)
- 2) Rt.#11 Road-cut (Salem, CT)
- **3)** Glacier Park (Ledyard, CT)
- **4)** Lantern Hill (North Stonington, CT)
- 5) Bailey's Ravine (North Franklin, CT)
- 6) Yantic Falls (Norwich, CT)
- 7) Dinosaur Park (Rocky Hill, CT)
- **8)** Gungywamp (Groton, CT)
- 9) Mashatucket Museum (North Stonington, CT)
- 10) Mamacoke Island (New London, CT)

Tentative Spring 2018 EAS K110 Lecture Schedule

Week	Торіс	Chapter(s)
1	Introduction/ Properties of earth	
2	Quiz 1- Mineralogy/ Rock Cycle & Rock types	1-2
3	Quiz 2- Metamorphism/ Glaciation	4
4	Quiz 3- Plate tectonics/ Orogeny	5-6
5	Quiz 4- Volcanism	7
6	Review & UNIT EXAM I	
7	Quiz 5 - Paleontology/ Geologic timetable & periods	8
8	Quiz 6- LAB PRACTICAL I / Marine environments / Tides	9-10
9	Quiz 7 - Atmospheric influences on weather	11
10	Quiz 8 - Meteorology/Pressure systems	12-14
11	Review & UNIT EXAM II	
12	Quiz 9 – Earth-Moon-Sun interactions/Lunation cycle	15
13	Quiz 10 - Solar system/Eclipses	16
14	Quiz 11/LAB PRACTICAL II Connecticut Geology	
15	Review/Final Exam	
******	***IMPORTANT DATES********	
	(26 April) Research Projects due	
	(08 May) Oral presentations	

(10 May) Final Exam

Syllabus Revisions:

This schedule may be subject to change as the instructor sees fit. The instructor will announce any changes in advance.

Research Topic Ideas:

- 1) Planetary beginnings
- 2) Cosmology
- **3)** Earth materials
- **4)** Earth's dynamic crust
- 5) Development of earth's major

features

- **6)** Time and Geology
- 7) Air, climate and weather
- 8) Structural Geology
- 9) Plate tectonics
- **10)** Volcanic activity
- **11)** Hydrothermal systems
- 12) Fault lines
- **13)** Connecticut's geology
- **14)** Connecticut's minerals
- 15) Mineralogy
- **16)** Orogeny and mountain formation
- 17) Earthquakes
- 18) Earth's magnetic field
- **19)** Energy resources from the earth
- **20)** Mineral resources from the earth
- **21)** Igneous rocks

- **22)** Sedimentary rocks
- **23)** Metamorphic rocks
- **24)** The rock cycle
- 25) Glaciation
- **26)** Geological timescale
- **27)** Weathering and erosion
- **28)** Sediments and sedimentation
- **29)** Folds and other rock deformations
- **30)** Dikes, sills, and magma
- **31)** Glacial erractics
- **32)** The hydrological cycle
- **33)** Hydrology and weather
- **34)** Aquifers
- **35)** Glacial landscapes
- **36)** Regional metamorphism
- **37)** Landscape evolution
- **38)** Interpreting the Grand Canyon

sequence

- **39)** Geology of mineral deposits
- **40)** Sedimentation in the sea

Research Topic Ideas (cont.)

- **41)** Earth's interior heat
- **42)** Exploring earth's interior
- **43)** Seismic waves
- **44)** Geological differences between oceans and continents
- **45)** Continental margins
- **46)** Topographic terranes of Connecticut
- **47)** Paleontology
- **48)** Fossils in Connecticut
- **49)** Dinosaur epochs
- 50) Unraveling geological history

Learning Outcomes- EAS K110:

- 1) The student will develop 'critical thinking skills' through the analysis of scientific data.
- 2) The student will be able to describe the scientific methods through examples.
- **3)** The student will be able to describe the characteristics of planet earth.
- **4)** The student will be able to identify the principle elements that make up geological formations.
- **5)** The student will demonstrate knowledge of ionic, covalent, and hydrogen bonding.
- 6) The student will demonstrate knowledge of lunar & solar eclipses, as well as, total, partial, & angular forms of eclipses.
- 7) The student will be able to identify igneous, metamorphic, & sedimentary rocks.
- 8) The student will be demonstrating knowledge of the rock cycle.
- 9) The student will demonstrate knowledge of plate tectonics.
- **10)** The student will be able to list the various geological time scales.
- **11)** The student will be able to explain the difference between particle sorting.
- **12)** The student will be able to identify minerals.
- **13)** The student will demonstrate knowledge of the various earth sciences.
- **14)** The student will demonstrate knowledge of the processes involved in the earth's formation.
- **15)** The student will provide and overall perspective of the earth as part of the universe.
- **16)** The student will be able define energy and state the laws of energy conservation.
- **17)** The student will be able to explain geomagnetic processes.
- **18)** The student will be able to define the term's geomorphism & topography.
- **19)** The student will be able to define the term's paleontology & glaciation.
- **20)** The student will to demonstrate knowledge of chemical composition of the earth's crust.
- **21)** The student will be able to explain the role of earthquakes & volcanoes.
- **22)** The student will be able to understand the relationship between humans & their planet.
- **23)** The student will demonstrate knowledge of the geological succession.
- 24) The student will demonstrate knowledge of the various earth science interactions.
- **25)** The student will be able to discuss some common theories pertaining to the origin of the earth and our solar system.
- **26)** The student will demonstrate knowledge of modern mapping techniques.
- **27)** The student will demonstrate knowledge of hydrothermal vent systems.
- **28)** The student will be able to illustrate the immensity of the solar system.
- **29)** The student will be able to list the types of bodies found in the solar system.

Learning Outcomes- EAS K110 (cont.)

- **30)** The student will demonstrate knowledge of meteorology.
- **31)** The student will be able to construct and read weather maps.
- **32)** The student will demonstrate knowledge of pressure systems and weather fronts.
- **33)** The student will be able to define convection and conduction and apply the two to winds and heat exchange.
- **34)** The student will be familiar with cloud types and able to recognize basic types.
- **35)** The student will gain working knowledge of relative humidity and dew point values.

Detailed Course Outline – EAS K110

I Introduction

A) Aspects of earth science

- **1.** Astronomy
- **2.** Meteorology
- **3.** Oceanography
- **4.** Geology

B) Elements of earth

- **1.** Atoms
 - **a)** Atomic number & mass
 - **b)** Behavior of electrons
 - c) Energy & stability of atoms
 - 1) Ions
 - 2) Isotopes
- **2.** Matter
 - a) Phases of matter
 - **b)** Influencing factors
 - 1) Temperature
 - 2) Pressure

C) Properties of earth

- **1.** Age of earth
- **2.** Age of universe
- **3.** Hydrosphere
- 4. Biosphere

II <u>Astronomy</u>

A) Planetary system

- **1.** Solar system
 - **a)** four inner terrestrial planets
 - **b)** four outer gaseous planets
 - **c)** one smallest, furthest planet
- **2.** Electromagnetic radiation
- **3.** Solar day
 - Sidereal time
- 5. Lunar day

II <u>Astronomy</u> (cont.)

B) Planetary motion

- **1.** Rotation
- **2.** Revolution
- **3.** Galactic rotation
- **4.** Eccentricity
- **5.** Aphelion
- **6.** Perihelion
- **7.** Precession
- **8.** Inclination
 - **a)** seasonal fluctuations
 - 1) solstices
 - 2) equinoxes

C) Earth – Moon system

- **1.** Leading theories of origin of moon
- **2.** Phases of moon
 - a) new moon
 - **b)** waxing crescent
 - **c)** first quarter
 - **d**) waxing gibbous
 - e) full moon
 - **f)** waning gibbous
 - **g**) third quarter
 - **h**) waning crescent
- **3.** Tides
- **a)** Spring tides
- **b**) Neap tides
- c) Apogee
- d) Perigee
- D) Eclipses
 - **1.** Ecliptical seasons
 - **a)** umbra
 - **b**) penumbra
 - **2.** Solar eclipses
 - **3.** Lunar eclipses
 - a) Lunar nodes
 - **4.** Partial
 - 5. Total
 - **6.** Angular

E) Earth's atmosphere

- **1.** Troposphere
- 2. Stratosphere
 - a) Ozone layer
- **3.** Mesosphere
- **4.** Thermosphere
 - a) Ionosphere

III <u>Meteorology</u>

- A) Climatology
 - **1.** Biomes

B) Weather influences

- **1.** Sun
- **2.** Ocean
- **3.** Topography
- **4.** Rotation & revolution of earth
- 5. Climate

C) Air masses & Air pressure

- **1.** High pressure systems
- **2.** Low pressure systems
- **3.** Wind
- **4.** Jet Streams
- **5.** Cloud formations
 - **a)** Condensation nuclei
 - **b)** Water vapor
 - c) Low atmospheric pressure
 - d) Three basic cloud forms
 - 1) Cirrus
 - 2) Strata
 - 3) Cumulus
 - e) Four families of clouds
 - 1) Development
 - 2) Height

D) Air masses & Fronts

- **1.** Aspects of air masses
 - **a)** Saturation value
 - **b)** Absolute Humidity
 - c) Relative Humidity
 - **d)** Dew Point
- **2.** Fronts & Cloud formation
 - **a)** Warm front
 - **b)** Cold front
 - c) Stationary front
 - d) Occluded fronts
- E) Weather Mapping
- F) Weather Symbols
- G) Weather Forecasting
- IV <u>Geology</u>
 - A) Divisions of solid earth
 - B) Earth's crustal composition
 - **1.** Oceanic crust
 - **2.** Continental crust
 - C) Mineralogy
 - **1.** Crystal & crystallization
 - **2.** Physical properties of minerals

- IV <u>Geology</u> (cont.)
 - D) Rock Cycle
 - **1.** Igneous
 - **2.** Sedimentary
 - **3.** Metamorphic
 - E) Crystallization of magma
 - **1.** Bowen's series of reactions
 - a) Granitic rocks
 - **b)** Andesitic rocks
 - c) Basaltic rocks
 - **d)** Pyroclastic rocks
 - 2. Igneous textures
 - a) Aphanitic
 - **b**) Phaneritic
 - c) Porphyritic
 - d) Glassy

F) Plate tectonics

- **1.** Divergent boundaries
 - **a)** Spreading center
- **2.** Convergent boundaries
 - a) Subduction zones
- **3.** Transform boundaries

G) Igneous activity

- **1.** Intrusive
- **2.** Extrusive
- **3.** Plutons
- 4. Volcanism
 - a) Types of volcanoes
 - 1) Shield
 - **2)** Cinder cones
 - 3) Composite
 - 4) Calderas
 - 5) Volcanic pipes & necks
 - 6) Fumaroles
 - 7) Fissure eruptions
 - 8) Intraplate volcanism
 - **b)** Volcanoes & climate

H) Seismic activity

- **1.** Types of seismic waves
 - a) Body Waves
 - 1) P waves
 - 2) S waves
 - **b)** Surface Waves
 - **1)** Raleigh waves
 - 2) Love waves
 - 2. Epicenter
 - **3.** Focus
 - 4. Earthquake Magnitude & Intensity
 - a) Richter scale
 - **b**) Mercalli scale

I) Plate Tectonics & Paleomagentism

- **1.** Curie point
- **2.** Magnetic reversals

J) Geological Time Scale

- **1.** Relative dating
- **2.** Radiometric dating

V <u>Mountain Building</u>

- A) Orogenesis
- B) Isostacy & Isostatic adjustment

C) Mountain Systems

- **1.** Folded Mountains
- 2. Fault-Block Mountains
- **3.** Upwarped Mountains
- 4. Volcanic Mountains

D) Rock Deformation

- **1.** Elastic deformation
- **2.** Plastic deformation
- E) Folds
 - **1.** Anticlines
 - **2.** Synclines
 - **3.** Domes
 - **4.** Basins

F) Joints & Faults

- **1.** Reverse fault
- **2.** Normal fault
- **3.** Lateral fault
- **4.** Thrust fault
- **5.** Transform fault
- **6.** Grabens
- 7. Horsts

VI <u>Oceanography</u>

A) Oceanic Zonation

- **1.** Vertical zonation
 - **a)** Photic zone
 - **b)** Bathyl zone
 - c) Abssal zone
 - d) Hadal zone
 - **2.** Horizontal zonation
 - a) Littoral zone
 - **b**) Neretic zone
 - c) Pelagic zone

B) Ocean floor

- **1.** Seamounts
- **2.** Guyots
- **3.** Atolls
- **4.** Reefs
- 5. Rises & Rifts
- **6.** Canyons
- **7.** Continental shelf
- **8.** Hydrothermal vent systems

- C) Oceanic Circulation
 - **1.** Wind & Currents
 - **2.** Pycnoclines
 - a) Halocline
 - **b)** Thermocline
 - **3.** Coriolus Effect
 - **4.** Tides
 - 5. Land Masses
 - a) Upwelling
 - **b)** Downwelling
 - **6.** Tides

VII <u>Glaciation</u>

A) Types of Glaciers

- **1.** Valley glaciers
- 2. Continental glaciers
- 3. Ice Caps
- **4.** Piedmont glaciers
- B) Glaciers & the hydrological cycle
- C) Glacial movement
- D) Glacial erosion
- E) Glacial deposits
 - **1.** Moraines
 - **2.** Outwashed plains
 - **3.** Kettleholes
 - **4.** Striate
- F) Causes of glaciation
- G) Glaciers in the geologic past

K) Plate Tectonics & Paleomagentism

- **3.** Curie point
- **4.** Magnetic reversals
- L) Geological Time Scale
 - **3.** Relative dating
 - 4. Radiometric dating

VIII <u>Connecticut Geology</u>

- A) Physiographic regions of CT
- B) Connecticut's geological history

C) Connecticut's terranes

- **1.** Newark terrane
- **2.** Avolonian terrane
- **3.** Iapetos terrane
- **4.** Proto-North American terrane
