

# **CONNECTICUT COMMUNITY COLLEGE NURSING PROGRAM (CT-CCNP)**

*Capital Community College, Gateway Community College, Naugatuck Valley Community College, Northwestern Connecticut Community College, Norwalk Community College, Three Rivers Community College*

## **NUR 102: FAMILY HEALTH NURSING**

**FALL 2015**

### **Course Prerequisite**

NUR 101: Introduction to Nursing Practice; PSY 111: General Psychology; BIO\*235: Microbiology

### **Course Corequisite**

NUR 103: Pharmacology for Families Across the Life Span; PSY 201: Life span Development; SOC 101 Principles of Sociology

### **Course Components**

Credits 8 credits Hours Classroom: 60 hours + Clinical: 180 hours

### **Course Description**

The student will focus on issues affecting the family, including childbearing, childrearing, geriatric care and intermediate health care needs of limited duration. The medical surgical health problems include care for the client in the perioperative period and the client experiencing orthopedic and simple genitourinary conditions. The course addresses several psychiatric disorders: anxiety and cognitive disorders, common child and adolescent psychiatric disorders. The student will have clinical rotations that provide experience caring for the childbearing family as well as caring for medical-surgical clients across the lifespan.

### **Course Objectives**

At the completion of this course, the student will be able to:

1. Apply principles of holism in providing nursing care for individuals and/or families from diverse cultures across the lifespan.
2. Demonstrate application of the nursing process when providing nursing care to individuals and/or families across the lifespan.

3. Administer safe and competent care to individuals and/or families using evidence-based practice, quantitative reasoning, and technological competence.
4. Demonstrate effective communication when interacting with individuals, families, and members of the health care team.
5. Implement a basic teaching plan for individuals and/or families with a learning need across the life span.
6. Foster a caring environment by demonstrating respect for individuals and/or families across the life span.
7. Demonstrate a basic ability to function as a member of the health care team.
8. Exhibit accountability and responsibility when providing nursing care to the individual and families across the lifespan.
9. Assume responsibility for personal growth and professional role development.

**Unit Objectives:** refer to class outline

### **Course Schedule**

Lecture: Wednesdays 8:30-10:30AM and 12:30-2:30PM College Laboratory: 8:00 a.m. to 2:30 or 3 p.m. four days as noted on calendar. Two Day Clinical experience as assigned. Please note calendar and Blackboard for specifics of clinical experiences.

### **Methods of Instruction**

This course is team-taught. Teaching modalities include lecture, discussion, simulations, case studies, demonstration, return demonstration, guest speakers, experiential exercises, small group activities, and clinical practice. Computerized programmed instruction and interactive video and simulations are also used. Blackboard Learn and Digication are used as learning management tools. It is advised to direct questions on course content to the professor responsible for that content.

### **Required Textbooks: (All textbooks are used in subsequent courses)**

Ackley, B.J., & Ladwig, G.B. (2010). *Nursing Diagnosis Handbook: An Evidence-Based Guide to Planning Care* (9th ed.). St. Louis, MI: Saunders/Elsevier. 978-0-323-07150-5

Patricia Colonghi, M.S.N.,R.N. Assistant Professor [pcolonghi@trcc.commnet.edu](mailto:pcolonghi@trcc.commnet.edu) Office: C242 Faculty Offices Phone & Voicemail: (860) 215-9477

**Part-Time Faculty:**

Elizabeth Briglia, M.S.N., R.N., Judy Dollard, M.S.N., R.N., Martha Healy, M.S.,RN, Kathleen Gauthier, M.S. CNM, Jennifer Telford, M.S.N., R.N.

**Nursing Lab Tutors:**

Sue Turner, M.S.N., R.N Educational Assistant Office Phone: (860) 215-9482  
[sturner@trcc.commnet.edu](mailto:sturner@trcc.commnet.edu) or BB Learn

Laurie Godaire, M.S.N., R.N., C.L.N. [lgodaire@trcc.commnet.edu](mailto:lgodaire@trcc.commnet.edu) or BB Learn

Kim Kobleski, R.N., B.S.N. [kkobleski@trcc.commnet.edu](mailto:kkobleski@trcc.commnet.edu) or BB Learn

**Faculty / Staff Availability**

Students are encouraged to seek clarification with the course coordinator as needed. Students are also encouraged to seek advisement with faculty as needed. Scheduled

faculty office hours are posted outside faculty offices. Students may also meet with faculty by appointment. All faculty, staff and peers look forward to your success and practice as a registered nurse. Please utilize your time and ours to develop your abilities to the fullest.

### **Nursing Program College Facilities**

Faculty offices are located within C wing second floor. The College lab is located in the A wing second floor. Computer labs are located within the nursing lab and throughout the campus (library and E wing). The Library is located in the C wing first floor.

### **Nursing Program Clinical Facilities**

William W. Backus Hospital, Norwich CT, Lawrence and Memorial Hospital, New London CT, St Francis Hospital and Medical Center, Hartford CT, Hospital for Special Care, New Britain, CT

### **Exams**

- Test answer sheets will be distributed at 8:20 am, exam booklets at 8:30 am
- Students are required to complete the answer sheet as directed, which includes student name, **accurate Banner ID number** and correct alternate test designation.
- Students will have one hour to complete exams and 2 hours to complete the final exam
- Students may not leave the exam room for any reason and return to the exam
- All books, coats, backpacks, bags, etc. must be left in your car or placed in the front of the exam room. **Cells phones turned off.**
- Eating and/or drinking are not permitted during exams
- Students may not wear hats during exams
- For mathematical calculations, the school will provide calculators.
- Wooden #2 lead pencils are to be used, no mechanical pencils
- Anyone who looks at another student's exam or who is seen talking either to himself or herself or to someone else during the exam may receive a zero grade.
- Exam scores will be posted on Bb/Vista no sooner than 48 hours after the exam
- Tardy or absence
  - It is expected that all students will be present and punctual for exams.
  - **In the event that the student will be absent for personal illness, the student must notify the course coordinator prior to 8 a.m. on the morning of the exam.**
  - Planned absences for vacations are not valid reasons for missing an exam
  - If warranted, one cumulative makeup exam will be offered at the end of the semester. Make up exams are graded on a raw score basis.

**Examination Schedule: All Are Taken in the Multipurpose Room (MPR)**

<b>Exams</b>	<b>Date</b>	<b>Weight</b>
Exam 1	9/16/15	15%
Exam 2	10/7/15	15%
Exam 3	10/28/15	15%
Exam 4	11/18/15	15%
Exam 5	12/9/15	15%
Final *	12/15/15 Tuesday	25%
<p><b>*In order to take the final exam, you must bring documentation with your signature that you have completed course evaluations to the final exam.</b></p>		

Med Calculation Exam	A 216/220	Friday 9/11/15 Passing $\geq$ 90%
----------------------	-----------	--------------------------------------

**Grading Policies :** To pass Nursing 102 and progress in the nursing program a student must do **ALL** of the following:

- Earn at least a 74 average in the theoretical portion of the course. Test items are drawn from ALL content of the course: theory, lab, clinical and math.
- Pass the clinical component of the course in a satisfactory manner.
- Pass Dosage Calculation Competency with 90% accuracy. Students may use (calculators provided by the college for all exams involving drug calculations. A student may not administer medications until s/he has successfully passed the dosage calculation examination. A student will be given three (3) attempts to pass the dosage calculation examination. A student who fails the dosage calculation examination must participate in remediation before taking the next examination. A student who fails the third (3rd) examination will be withdrawn from the nursing course and dismissed from the nursing program.

- Pass clinical skills validations. Three (3) opportunities will be given to pass the skills verification. Students unable to pass critical criteria must attend mandatory remediation prior to a repeat attempt. 3<sup>rd</sup> attempt will be evaluated by full-time faculty.

### **Evaluations:**

**Clinical:** A conference will be scheduled **by the learner** with his/her clinical instructor for discussion and evaluation **of the student's progress at the end of each clinical week**. A formative clinical evaluation form will be completed by the instructor and reviewed by the student at these times. Clinical performance is evaluated on the basis of how well the learner meets the objectives and achievements identified on the evaluation form. Students must successfully meet the clinical objectives in order to pass the course. Students are responsible for self-evaluation and documentation. Students will submit their Assessment Collection Tool and Nursing Care Plan as assigned. A summative evaluation will be completed and reviewed at the end of the semester.

- **Theory:** There will be five *50 minute exams* (with 30-50 questions on each exam) and one 2 hour cumulative final examination (with 100 questions) in Nursing 102. The exams will start at 8:30AM. Class will resume promptly at 9:30 a.m.
- **Weight:** 5 exams, each worth 15% = 75% of total grade. Final examination = 25% of total grade. The five exams plus the final = the letter grade in the course.
- The final course grade also requires a satisfactory evaluation for clinical performance and successful completion of the Med Math test and Clinical Validations.

### **The grading criteria are:**

A 93-100, A- 90-92,

B+ 87-89, B 83-86, B- 80-82

C+ 77-79, C 74-76

D+ 67-69, D 64-66, F 0-65

**EVALUATIONS:** *The student must complete evaluations for the course, faculty, and clinical instructor/s before grades will be released.*

**Nursing Program Policy Handbook: The student is responsible for content in the TRCC and Nursing Program Handbooks.** Refer to the Nursing Program Policy Handbook for detailed information regarding:

- Missed Exams

- Clinical Evaluations
- College Labs
- Attendance
- Required Clinical Equipment
- Professional Appearance in the Clinical Sites
- Professional conduct in classroom, lab and clinical
- Return if withdraw
- Inability to return under certain circumstances
- Attendance Policy:** Students are expected to attend each lecture, classroom laboratory and clinical experience. It is the student's responsibility to notify the instructor if absence is necessary and to fulfill objectives of the experience. All clinical absences are to be made up as per the Nursing Program Policy Handbook.
- Test Make-Up Policy:** If you must be absent from a scheduled test due to illness or other emergency, contact the course coordinator by 8 a.m. on the morning of the test 860-215-9447. *Failure to do so may result in a failing grade for that test. Any student taking a make-up examination will have 15 points subtracted from the examination grade unless documentation of extenuating circumstances has been provided and approved.* Students with an approved absence from scheduled tests will be given an alternate form of the examination at a time and date toward the later part of the semester. The make-up is cumulative.

**Statement on Penalty for Academic Dishonesty or Plagiarism:** Plagiarism is the **unacknowledged** use of another person's words or ideas in your writing. Whether conscious or not, plagiarism is a serious offense. Evidence that you did not write material that you submit under your name can result in failure for the entire course. Refer to the 2013-2014 College Catalog for policy. Students are expected to: "Demonstrate academic integrity by not engaging in conduct that has as its intent or effect the false representation of a student's academic performance, including but not limited to: (a) cheating on an examination; (b) collaborating with others in work to be presented, contrary to the stated rules of the course; (c) plagiarizing, including the submission of others' ideas or papers (whether purchased, borrowed or otherwise obtained) as one's own; (d) stealing or having unauthorized access to examination or course materials; (e) falsifying records or laboratory or other data; (f) submitting, if contrary to the rules of a course, work previously presented in another course; and (g) knowingly assisting another

student in any of the above, including an arrangement whereby any work, classroom performance, examination, or other activity is submitted or performed by a person other than the student under whose name the work is submitted or performed.” Consequences are delineated in the College Catalog.

**Additional Expected Activity Requirements:** Students are expected to participate in class discussions, role-play, group presentations, simulations, material review and lab practice. Participation enhances the learning experience and allows students and instructors the opportunity to learn from each other. Students will be expected to submit work; Select Sim Chart CLEW(s), Reflection(s), Process Recording, and Geriatric nursing Assignment to *Digication*.

### **Study Groups**

Students are encouraged to form study groups which can meet in the lab or at the groups' mutual location choice. Tutors within the nursing lab are available also during posted hours of the Nursing Laboratory. Students are encouraged to be proactive in their learning and seek help independently. Referrals may be made by faculty for lab and theory improvement. The Nursing Lab and Nursing Tutors are in place to promote success and retention. Students are encouraged to utilize these independent opportunities weekly. Practice materials are within your N102 Course Shell on Blackboard Learn, Text book Web Sites and CDs / DVDs, material within the nursing laboratory and library. Sample exam questions can be found within these materials. Some students have recommended the following book for practice with first semester Nursing Exam Questions. It is available to use in our nursing laboratory.

- Nugent, P. A., & Vitale, B. A. (2008). *Test Success, Test-Taking Techniques for Beginning Nursing Students* (5th ed.). Philadelphia: F.A. Davis.

### **Classroom Behavior**

Demeanor is a vital part of participation. Students should behave appropriately at all times and are asked to practice common courtesy, recognizing each person's right to learn in an atmosphere conducive to the learning experience. Students who violate the rules of courtesy and/or professional demeanor will be asked to leave. Students are required to attend all class meetings. Tardiness and early leaves as well as absences have a direct impact on student learning.

### **GERIATRIC NURSING PRESENTATIONS:**

Each clinical group will deliver a presentation that covers a portion of the geriatric nursing care content, using real case scenarios from your medical/surgical nursing experiences. Each clinical group will receive a topic (TBD), and each presentation will be

a maximum of 20-30 minutes. The presentations will take place during class time. Each student will have the opportunity to earn 2 points on the exam that includes the geriatric content.

Please refer to the syllabus and curriculum objectives. We will focus on topics such as ageism, functional assessments/ability, normal physiologic changes in aging, theories of aging (continuity, disengagement, and activity theory), psychosocial changes, polypharmacy, caregiver role-strain, and cognitive changes in aging. During weekly clinical assignments you apply this knowledge each time you provide nursing care to the older adult and their family.

### **LEARNING ACTIVITIES:**

Many of the classes require learning activities to be completed prior to attending class. It is expected that the required work be completed so students can fully participate in each class.

### **DIGICATION:**

All students are required to maintain a learning portfolio in Digication that uses the school template.

1.) **During your last week of clinical**, prepare a summative reflection (using the same reflective tool you use each week). Address each core value in regards to the entire semester experience. Reflect on the entire clinical semester

\*Once you have completed this work send **your clinical instructor** an invitation to your Digication account.

**WITHDRAWAL POLICY:** Students may withdraw, in writing, at the Registrar's Office for any reason. Refer to the Nursing and College Student Handbooks and College Catalog. Students who receive an *overall* unsatisfactory clinical grade at any time in the rotation will fail this course and receive a grade of F. Students who receive a clinical grade of Fail should consult the Student Handbook for CTC CNP policies. This course does not offer midterm theoretical warning grades. Students with concerns about their course average are encouraged to contact the course coordinator.

**DISABILITIES STATEMENT:** If you have a hidden or visible disability which may require classroom or test-taking modifications please see the course leader as soon as possible. If you have not already done so, please be sure to register with Chris Scarborough if you have a learning disability, ADD or ADHD, or Student Services for other physical disabilities. Please see the Three Rivers Community College Catalog for additional policies and information.

**CLINICAL CANCELLATION DUE TO INCLEMENT WEATHER:** When the

college is closed for reasons of inclement weather, clinical experiences will also be canceled. When the college delays opening, clinical experiences will also have a later start time. However, students should use discretion in traveling in poor weather conditions. If you are unable to report to scheduled clinical experiences, be sure to notify your clinical instructor and the appropriate nursing unit. Preplanning and communication with your clinical instructor and course leader is important. (The College Student Handbook and Catalog lists radio stations announcing cancellations.) There also will be a notice of delays or cancellation on a recording at 860 215-9000, posted on the Three Rivers Web Page: [www.trcc.commnet.edu](http://www.trcc.commnet.edu), Blackboard Learn. It is strongly encouraged you sign up for Early Alert (notification via email or text).

**CONNECTICUT COMMUNITY COLLEGE NURSING PROGRAM (CT-CCNP)**

*Capital Community College, Gateway Community College,  
Naugatuck Valley Community College, Northwestern Connecticut Community College,  
Norwalk Community College, Three Rivers Community College*

**NUR\* 102: Family Health Nursing  
Laboratory Topics Schedule**

**Obstetrical/Pediatric Nursing Topics**

Lab Topic	Time
Breastfeeding (1 hour theory)	1 hour
Newborn Assessment and Care	2.5 hours
Post Partum Assessment/Care	1.5 hour
Child Birth Education (i.e. Lamaze)	1 hour
TOTAL	6

**Combined Nursing Topics**

Lab Topic	Time
Urinary Catheterization Content (includes CBI)	1.5 hour
Urinary Catheterization Practice	1.5 hours
IVPB Content	2 hours
IVPB Practice	1 hour
Medication Calculation Testing or Support	1 hour
VALIDATIONS IVPB & CATHETERIZATION	2
TOTAL	9.0

**Medical/Surgical Topics**

Lab Topic	Time
Blood Transfusion	1.5 hours
Surgical Assessment	1.5 hour
Decompression Tubes Content Indications, placement, patency, Enteral Tube Medication Administration and Practice	2.0 hours
PCA/Epidural pumps	1 hour
Ortho Lab/Disorders of the Musculoskeletal System	1 hour
VALIDATION: ENTERAL MED ADMINISTRATION	1 hour
TOTAL	8.0
<i>Floating Hour to be applied at faculty team discretion</i>	1.0

HOURS	NURSING 102 TOTAL LAB	24
-------	-----------------------	----

**NUR\*102: Family Health Nursing**  
**On Campus Clinical Laboratory: Care of Breastfeeding Clients (1 hour)**

**\*Note to students: assigned readings to be completed prior to laboratory attendance**

<b>Nursing Care of Breastfeeding Clients</b>	
<b>Learning Objectives</b>	<b>Suggested Learning Activities</b>
<p>Upon completion of the Learning Laboratory the student will be able to:</p> <ol style="list-style-type: none"> <li>1. Discuss breastfeeding readiness and indications of infant hunger</li> <li>2. Describe signs that baby is getting enough milk</li> <li>3. Identify steps to ensure correct breastfeeding latch</li> <li>4. Discuss and demonstrate various infant holding positions to promote comfort, support and ease of breastfeeding</li> <li>5. Apply the nursing process to breastfeeding issues</li> <li>6. Identify benefits for both mother and baby related to breastfeeding.</li> </ol>	<p>Review handouts/readings/videos related to breastfeeding</p> <p>Guest speaker</p> <p>Demonstration of various breastfeeding techniques</p>

**Combined Nursing Topics**  
**NUR\*102: Family Health Nursing**

**On Campus Clinical Laboratory: Nursing Care and Assessment of Newborns (2.5hours)**

**\*Note to students: assigned readings to be completed prior to laboratory attendance**

<b>Nursing Assessment and Care of Newborns</b>	
<b>Learning Objectives</b> Upon completion of the Learning Laboratory the student will be able to:	<b>Suggested Learning Activities</b>
<ol style="list-style-type: none"> <li>1. Identify normal newborn reflexes</li> <li>2. Review the correct techniques for administration of newborn medications including routes, sites and equipment needed</li> <li>3. Describe the components of a complete newborn exam including normal variants vs. abnormal findings</li> <li>4. Describe care of the newborn following circumcision</li> <li>5. Review the components of a baby bath</li> <li>6. Discuss the variety of formulas and nipples used for bottle fed babies.</li> <li>7. Discuss ways to keep newborns safe from abduction and SIDs prevention</li> </ol>	<p>Review handouts/readings/videos related to newborn assessment and care</p> <p>Demonstration and practice with return demonstration of newborn assessment using newborn manikins/Sim Baby</p> <p>Critical Thinking scenario and small group discussion: newborn care</p> <p>Guest speaker</p> <p>Case Study</p>

**Combined Nursing Topics**  
**NUR\*102: Family Health Nursing**

**On Campus Clinical Laboratory: Nursing Care and Assessment of the Postpartum Client (1.5 hours)**

**\*Note to students: assigned readings to be completed prior to laboratory attendance**

<b>Nursing Assessment and Care of the Postpartum Client</b>	
<b>Learning Objectives</b>	<b>Suggested Learning Activities</b>
Upon completion of the Learning Laboratory the student will be able to:	
<ol style="list-style-type: none"><li>1. Describe a systematic “Bubble” assessment of a postpartum client<ol style="list-style-type: none"><li>a. Breast</li><li>b. Uterus/fundus</li><li>c. Bladder</li><li>d. Bowel</li><li>e. Lochia</li><li>f. Episiotomy, Emotional</li></ol></li> <li>2. Describe routine care of the mother who has delivered her infant vaginally vs. cesarean section</li></ol>	Review handouts/readings/videos related to postpartum assessment and care  Student practice a return demonstration of a post partum assessment  Critical Thinking scenario and small group discussion  Case Study  Guest speaker  Readings: D&C Ch 12, Ch 11 pp.305, Ch 13

**Combined Nursing Topics**  
**NUR\*102: Family Health Nursing**

**On Campus Clinical Laboratory: Care of Clients Requiring Urinary Catheterization (1.5 hours)**

**\*Note to students: assigned readings and videos to be completed prior to laboratory attendance**

<b>Part A: Nursing Care of Clients Requiring Urinary Catheterization</b>	
<b>Learning Objectives</b> Upon completion of the Learning Laboratory the student will be able to:	<b>Suggested Learning Activities</b>
<p>7. Describe the indications for urinary catheterization, such as:</p> <ul style="list-style-type: none"> <li>a. measuring residual urine volume</li> <li>b. urinary retention</li> </ul> <p>8. Describe the procedure for assessing post void residual urine using straight catheterization</p> <p>9. State the advantages of using a bladder scanner to assess urine volume.</p> <ul style="list-style-type: none"> <li>a. Relate the steps for assessing bladder urine volume using a bladder scanner.</li> </ul> <p>10. Describe the nursing assessments that should be done prior to catheterizing a client</p> <p>11. Describe nursing considerations related to catheterization of a female vs. a male client</p> <p>12. Describe the procedural differences between straight and indwelling catheterization</p> <p>13. Identify the equipment needed to perform urinary catheterization</p> <p>14. Compare and contrast the different types of urinary catheters</p> <p>15. State expected outcomes following completion of the procedure</p> <p>16. Discuss key principles related to urinary catheterization</p>	<p>Review handouts/readings/videos related to urinary catheterization.</p> <p>Review handouts/readings/videos related to bladder scanning</p> <p>Faculty demonstration of urinary catheterization and removal of indwelling catheter.</p> <p>Student practice on SimMan®: insertion of indwelling catheter, removal of catheter.</p> <p>Review of validation performance checklist for urinary catheterization.</p> <p>Critical thinking exercise and small group discussion: urinary catheterization</p>

## Combined Nursing Topics

- |  |  |
|--|--|
| <ol style="list-style-type: none"><li>17. Demonstrate aseptic technique during catheterization and related procedures using laboratory simulation models.</li><li>18. Discuss the risks and potential complications associated with catheterization, and the nursing interventions to prevent them</li><li>19. Discuss client teaching related to urinary catheterization</li><li>20. Demonstrate collection of a urine specimen from a continuous bladder drainage system.</li><li>21. Review/Discuss routine catheter care and the procedure for removal of an indwelling catheter (NUR*101)</li></ol> |  |
|--|--|

## Combined Nursing Topics

<b>Part B: Nursing Care of Clients Requiring Continuous Bladder Irrigation (CBI) and Open Intermittent Catheter Irrigation</b>	
<b>Learning Objectives</b>	<b>Suggested Learning Activities</b>
<p>Upon completion of the Learning Laboratory the student will be able to:</p> <ol style="list-style-type: none"> <li>1. Discuss the indications and purposes of urinary bladder and catheter irrigation.</li> <li>2. Describe the indications for closed continuous (CBI) vs. open catheter (Intermittent) irrigation</li> <li>3. List the equipment needed to perform closed continuous and open intermittent irrigation.</li> <li>4. Describe the nursing assessments related to catheter irrigation.</li> <li>5. State the expected outcomes following completion of the procedure</li> <li>6. List the steps required for performing closed continuous bladder irrigation.</li> <li>7. List the steps required for performing open intermittent catheter irrigation.</li> <li>8. Describe nursing considerations related to the prevention of infection when performing catheter irrigation.</li> </ol>	<p>Review readings/handouts/videos related to CBI and open intermittent catheter irrigation.</p> <p>Demonstration and practice setting up a CBI and performing open intermittent catheter irrigation.</p> <p>Critical thinking exercise and small group discussion: bladder irrigation.</p>

**Combined Nursing Topics**  
**Competency Assessment/Validation:**  
**Insertion of an Indwelling Urinary Catheter**

**Competency Assessment/Validation:**  
**Insertion of an Indwelling Urinary Catheter for a Female Client**

Student: \_\_\_\_\_ Date: \_\_\_\_\_

<b>Psychomotor Skill</b> ( <i>Note: specific skills may vary slightly in accordance with equipment or facility protocol</i> )	S/U
<b>Part I: Preparation for Catheterization</b>	
1. Check M.D. order	
2. Gather equipment for catheterization <ul style="list-style-type: none"> <li>a. Correct catheterization kit (Straight or Foley) and correct catheter size</li> <li>b. Extra pair of sterile gloves, extra sterile catheter or kit of correct size and type</li> <li>c. Bath blanket and linen protector</li> </ul>	
3. Identify patient and explain procedure	
4. Wash hands	
5. Provide privacy	
6. Raise height of bed	
7. Position patient in dorsal recumbent position with knees flexed	
8. Drape patient with bath blanket	
9. Cleanse perineum prn and identify anatomical landmarks	
<b>Part II: Getting the Field Ready</b>	
1. Open catheter kit	
2. Place outer plastic wrap at end of bed for waste disposal	
3. Place catheter set on bed between patient's legs	
4. Open outer wrap using principles of sterile technique	
5. Using sterile technique place sterile drape, plastic side down, under buttocks	
6. Don sterile gloves	
7. Place fenestrated drape over perineum maintaining sterility	
8. Organize equipment in order of use <ul style="list-style-type: none"> <li>a. Place cotton balls/swabs, antiseptic solution, and lubricant closest to patient</li> <li>b. Pour antiseptic over cotton balls or open packet with swabs</li> <li>c. Test catheter balloon for leaks (unless manufacturer does not recommend )</li> <li>d. Pull back fluid to deflate balloon but leave syringe attached to lumen</li> <li>e. Squirt lubricant onto tray</li> <li>f. Lubricate tip of catheter 2 inches</li> </ul>	
<b>Part III: Inserting Catheter</b>	
1. Separate the labia minora with your non-dominant hand to expose urethral meatus	
2. Cleanse meatus, using downward strokes (front to back) <ul style="list-style-type: none"> <li>a. Far labial fold first</li> <li>b. Near labial fold next</li> <li>c. Over center of meatus last</li> </ul>	
3. Pick up catheter (3in. from tip) with dominant hand	
4. Ask patient to bear down gently as if to void	
5. Insert catheter 2-3 in. or until urine flows: when urine is seen, advance 1-2 in.	

## Combined Nursing Topics

6. Release labia and hold catheter in place with non-dominant hand	
7. Inflate balloon with recommended amount of sterile water and tug gently	
8. Allow bladder to empty	
9. Attach end of catheter to end of tubing on urinary drainage device if not pre-attached	
10. Remove gloves and wash hands	
11. Follow hospital protocol regarding securing catheter to leg (use clean gloves)	
<b>Part IV: Patient Assessment and Documentation</b>	
1. Assess color, clarity, odor, and amount of urine obtained	
2. Cleanse patient's perineum (insure that patient is clean and dry)	
3. Remove drapes	
4. Perform Documentation per facility protocol

**On Campus Clinical Laboratory: Intravenous Piggy Back Administration (IVPB) (2 hours)**

**\*Note to students: assigned readings and videos to be completed prior to laboratory attendance**

<b>Nursing Care of Clients requiring Intravenous Administration Medication</b>	
<b>Learning Objectives</b> Upon completion of the Learning Laboratory the student will be able to:	<b>Suggested Learning Activities</b>
<ol style="list-style-type: none"> <li>1. Discuss the indications and methods of administration for IV piggy back (IVPB) medications.</li> <li>2. Demonstrate safe and competent practice during IV piggyback medication administration               <ol style="list-style-type: none"> <li>a. Assessment of client allergies</li> <li>b. Calculation of correct dose</li> <li>c. Verification of medication compatibility</li> <li>d. Maintenance of aseptic technique during preparation and administration of IV medications</li> <li>e. Accurate reconstitution of IVPB medication</li> <li>f. Regulation of infusion at prescribed rate</li> <li>g. Assessment of client response to IVPB medication</li> </ol> </li> <li>3. Relate potential complications associated with IVPB medication administration.</li> <li>4. Demonstrate correct technique for saline lock med/intermittent infusion device administration (i.e. S-A-S)</li> </ol>	<p>Review of handouts/readings/videos related to IV piggyback medication administration.</p> <p>Demonstration and practice of preparing IV medication for administration via piggyback and saline lock/intermittent infusion device.</p> <p>Small group work-return demonstration (calculate dose, mix medication in mini bag, calculate infusion rate, back prime secondary line) utilizing laboratory equipment</p> <p>Practice IV medication reconstitution and calculation of piggyback drip rates.</p> <p>Critical Thinking Exercise with small group discussion Case study: client scenarios</p> <p>Review IVPB Validation Performance checklist</p>
<ol style="list-style-type: none"> <li>5. Discuss principles related to the administration of Intravenous medication/additives via a primary solution (i.e. Potassium, multivitamins)</li> </ol>	<p>Demonstration and practice of adding medication to primary IV solution.</p>
<ol style="list-style-type: none"> <li>6. Demonstrate the procedure for administering IV medication utilizing an infusion pump</li> </ol>	<p>Small group work-return demonstration utilizing laboratory equipment</p>

## Combined Nursing Topics

### Competency Assessment/Validation: Administration of Piggyback Medication via Secondary Line (IVPB)

Student: \_\_\_\_\_ Date: \_\_\_\_\_

<b>Psychomotor Skill</b> <i>(Note: specific skills may vary in accordance with equipment or facility protocol)</i>	<b>S/U</b>
1. Washes hands	
2. Obtains ordered medication and does three checks against M.D. order on MAR	
3. Verbalizes checking compatibility of medication with primary solution/additives	
4. Gathers appropriate equipment <ul style="list-style-type: none"> <li>a. Inspects solution for clarity, color, expiration date.</li> <li>b. Selects appropriate tubing and dates tubing per facility protocol</li> </ul>	
5. Clamps secondary tubing and spikes IVPB bag	
6. Calculates drip rate precisely	
7. Properly identifies client and explains procedure	
8. Washes hands and gathers gloves	
9. Dons gloves and assesses IV site for: <ul style="list-style-type: none"> <li>a. changes in temperature</li> <li>b. edema</li> <li>c. leakage</li> <li>d. color (pallor, redness)</li> <li>e. pain or tenderness</li> </ul>	
10. Cleanses upper Y-port on primary tubing with alcohol wipe and attaches secondary set	
11. Purges air from secondary tubing by back priming (i.e. lowers IVPB below level of Primary bag)	
12. Closes roller clamp on secondary tubing and hangs IVPB bag on pole	
13. Lowers primary bag on hanger	
14. Opens secondary tubing clamp completely	
15. Sets rate using primary line clamp, adjusted to within 5 gtts of correct rate	
16. Rechecks site to verify no infiltration, pain, leakage	
17. Verbalizes need to recheck site and rate again in 5-10 min	
18. Maintains principles of asepsis throughout procedure	
19. Documents per facility policy

Discuss measures to prevent complications when administering medications via an enteral tube such as:               <ol style="list-style-type: none"> <li>a. Dislodging of tube</li> <li>b. Clogging of tube</li> </ol> </li> <li>6. State expected client outcomes following completion of medication administration via an enteral tube</li> </ol>	<p>Review of readings/handouts/videos for medication administration via enteral tubes</p> <p>Faculty demonstration and student practice of procedure.</p> <p>Critical thinking exercise/ case study with small group discussion.</p> <p>Review of validation performance checklist for medication administration via enteral tubes.</p>

**Medical/Surgical Topics**  
**Competency Assessment/Validation:**  
**Medication Administration via an Enteral Tube**

Student: \_\_\_\_\_ Date: \_\_\_\_\_

<b>Psychomotor Skill (Note: specific skills may vary in accordance with equipment or facility protocol)</b>	<b>S/U</b>
1. Gathers supplies (60 mL catheter tip syringe)	
2. Prepares medication per procedure using MAR, 6 Rights, Checks 2 forms of identity	
3. Obtains liquid form or crushes meds a. Verbalizes verification that medication is crushable b. Verbalize to dilute crushed medication with 30 mL water	
4. Assess that tube is securely taped or fastened	
5. Places towel under work area	
6. Places patient in high fowler's position	
7. Dons clean gloves	
8. Disconnects tube from feeding or suction or removes plug a. Holds tube up above level of stomach b. Pinches tube or uses Lopez valve to prevent backflow and leaking	
9. Confirms tube placement: checks markings, checks aspirate color and pH a. Draw up 30 mL of air into 60 mL syringe b. Attach to end of feeding tube c. Flush tube with 30 mL of air before attempts to aspirate fluid d. Draw back on syringe slowly-obtaining 5-10 mL of gastric aspirate e. Gently mix aspirate in syringe f. Measure pH-dipping the pH strip into fluid or by applying few drops of fluid to the strip-comparing with the color on the chart provided by manufacturer i. Gastric contents < 4, tube feeding pH usually 5 or greater, ph of pleural fluid from the tracheabronchial tree is generally > 6	
10. Verbalizes how to aspirate for residual if feeding a. Return aspirated contents unless excessive amount (usually > 100cc)	
11. Flushes with 30 mL of warm water	
12. Removes plunger of syringe a. Pinches/kinks gastric tube b. Places end of syringe into gastric tube	
13. Administers meds by gravity, pours each med separately, flushes with 10 mL H <sub>2</sub> O between each med	
14. After last medication flushes with 30-60 mL H <sub>2</sub> O	
15. Pinches gastric tube, removes syringe and inserts clamp or connects to tube feeding. Do not reconnect to suction for 60 minutes	
16. Positions client with HOB elevated 30-45 degrees for 1 hour	
17. Records total amount of fluid given	
18. Verbalizes how to irrigate a nasogastric tube to suction using 30 mL normal saline

**On Campus Clinical Laboratory:**

**Pain Management: Nursing Care of Clients with Epidural or Patient Controlled Analgesia (PCA) (1 hour)**

**\*Note to students: assigned readings and videos to be completed prior to laboratory attendance**

<b>Nursing Care of Clients with Epidural or Patient Controlled Analgesia (PCA)</b>	
<b>Learning Objectives</b> Upon completion of the Learning Laboratory the student will be able to:	<b>Suggested Learning Activities</b>
<ol style="list-style-type: none"> <li>1. Describe patient controlled analgesia and the different modalities used to provide it.</li> <li>2. Discuss the evidence to support the advantages of PCA and epidural analgesia (evidenced based practice)</li> <li>3. Identify clients who would be candidates for PCA/epidural pain management.</li> <li>4. State the agents (i.e. opioids) commonly used for PCA and epidural pain management.</li> <li>5. Discuss concerns / safety issues related to PCA / epidural use.</li> <li>6. Discuss principles and safety features of PCA / epidural pump operation.</li> <li>7. Describe the process for client activation of PCA devices</li> <li>8. Describe safe and competent nursing care of the client receiving PCA/ epidural analgesia               <ol style="list-style-type: none"> <li>a. Design a nursing care plan for the client receiving PCA/ epidural analgesia to include but not be limited to:                   <ol style="list-style-type: none"> <li>i. nursing assessments to monitor client response to PCA/epidural analgesia</li> <li>ii. nursing assessments to monitor the safety of the client receiving PCA/ epidural analgesia</li> </ol> </li> </ol> </li> </ol>	<p>Review of readings/handouts/videos related to care of the client receiving PCA/epidural pain management.</p> <p>Review of readings/handouts/videos related to epidural catheter management</p> <p>Review of equipment used in providing PCA and epidural pain management.</p> <p>Discuss nursing implications related to client teaching and safety with PCA and epidural.</p> <p>Case study/ critical thinking exercise and small group discussion related to the care of clients receiving PCA/epidural pain management.</p>

## Medical/Surgical Topics

iii. nursing interventions for the client receiving PCA/ epidural analgesia

**Orthopedics Lab: Nursing Care of Clients with Disorders of the Musculoskeletal System (1 hour)**

**\*Note to students: assigned readings and videos to be completed prior to laboratory attendance**

<b>Nursing Care of Clients with Disorders of the Musculoskeletal System</b>	
<b>Learning Objectives</b>	<b>Suggested Learning Activities</b>
<p>Upon completion of the Learning Laboratory the student will be able to:</p> <ol style="list-style-type: none"> <li>1. Discuss nursing considerations related to mobilizing clients with joint replacements and hip fractures.</li> <li>2. Relate the principles and rationale of hip precautions and their importance in preventing postoperative dislocation.</li> <li>3. Describe quad and glut setting exercises.</li> <li>4. Compare and contrast the different weight bearing status orders commonly seen with post-operative orthopedic clients.</li> <li>5. Discuss the fitting and use of ambulatory devices appropriate for a client's weight bearing status.</li> <li>6. Describe functional assist levels and their implications for safely mobilizing the post-op orthopedic client.</li> <li>7. Review the equipment used in the care of clients with fractured hip and major joint replacements.</li> <li>8. Relate the purposes, types, complications, and nursing care of the patient in a cast.</li> <li>9. Plan and implement care for the patient in a cast.</li> </ol>	<p>Power point presentation by guest expert physical therapist.</p> <p>Demonstration of mobilization techniques and hip precautions by physical therapist.</p> <p>Discussion and question and answer session with physical therapist.</p> <p>Student practice of mobilization techniques on peers.</p>
