Grading: 4 Quizzes = 50%, Mid-term Exam = 25%, Final Exam = 25%

Objective: This course introduces students to the source, use and limitations of materials used in building construction. Emphasis shall be placed on the basic design concepts and the practical applications of building materials in-the-field. Focus is also placed on historical uses of material as design expression. Practical working knowledge is attained through site visits of projects under construction (as available).
