

SYLLABUS

CHE*K122 General Chemistry II Three Rivers Community College Norwich, CT 06360

Michael P. Carta, Instructor of Chemistry

Office: C168

Office Phone: 860-885-2385

Email: mcarta@trcc.commnet.edu

Office Hours: MTW 2:30-3:30

*****Special Notice*****

If you have a visible or hidden disability which may require classroom, lab, and/or test-taking modifications, please see me as soon as possible. If you have not registered with Chris Scarborough, learning specialist at (860) 823-2985 or a counselor in the Student Services Development Center, you must do so early in the semester.

Course: General Chemistry II/CHE*K122

Credits: 4 credit hours (3hr lecture/3hr lab each week)

Course Description: Further study of the principles, theories and laws of chemistry. Topics include kinetics, equilibrium, thermodynamics, oxidation-reduction, electrochemistry, organic chemistry, nuclear chemistry and the chemistry of the elements and their compounds.

Prerequisites: CHE*K121 with a "C" grade or better, MAT* K186 with a "C" grade or better.

Text: *Chemistry*, 10th ed., Chang, McGraw-Hill.

Other Required Materials: Chemical safety goggles, 3-hole folder for lab, scientific calculator.

General Course Objectives:

1. To provide students with a solid understanding of the fundamental concepts of chemistry.
2. To encourage students to apply problem-solving skills toward chemical calculations.
3. To educate students in the language and nomenclature of chemistry.
4. To help students relate chemical concepts to practical applications.

Class Attendance Policy:

Attendance of all class activities in lecture and laboratory is required. Absences are counted from the first meeting of class. More than four consecutive or more than six accumulative absences could result in a student receiving an "F" grade in this course. An explanation of the cause of all absences should be given to your instructor.

Academic and Classroom Misconduct:

The instructor has primary responsibility for control over classroom and/or laboratory behavior and maintenance of academic integrity, and can request the temporary removal or exclusion from the classroom or laboratory of any student engaged in conduct that violates the general rules and regulations of the institution. Or any student engaged in conduct deemed hazardous in the laboratory. Extended or permanent exclusion from lecture or laboratory activities or further disciplinary action can only be effected through appropriate procedures of the institution. Plagiarism, cheating on quizzes or tests, or any form of academic dishonesty is strictly prohibited. Students guilty of academic dishonesty directly or indirectly will receive a zero for the exercise or quiz or test and may receive an "F" grade for the course in addition to other possible disciplinary sanctions which maybe imposed through the regular institutional procedures. Any student that believes that he or she has been erroneously accused may appeal the case through the appropriate institutional procedures if their grade was affected.

College Withdrawal Policy:

Any student who finds it necessary to discontinue this course MUST complete a withdrawal form in the Registrar's Office at the time of the withdrawal. Students may withdraw from the course any time during the 14 weeks of class to receive a "W" grade for the course (Deadline will be announced). Students who do not withdraw, but stop attending will be assigned an "F" grade in this course. Verbal withdrawals CANNOT be accepted. If you are unable to withdraw in person, you may call the Registrar's Office and provide them with the appropriate information. *Once you withdraw from the course you are no longer eligible to attend class or take any remaining quizzes or tests.*

Revisions to the Syllabus:

Students are responsible for learning all of the objectives and all of the items in the course outline whether they are discussed in lecture and/or laboratory or not. The instructor reserves the right to revise the objectives, topical outline, or academic schedule contained in this syllabus without notice. However, if the revisions affect scheduled unit tests a 48-hour notice will be given for the new test date.

Grade Determination:

4 Unit Tests.....75%

Lab (reports, lab midterm, lab final).....25%

Grade Scale: There will be no grading on the normal distribution curve.

100.00 - 93.50 = A	79.49 - 77.50 = C+	59.49 - 00.00 = F
93.49 - 90.00 = A-	77.49 - 73.50 = C	
89.99 - 87.50 = B+	73.49 - 69.50 = C-	
87.49 - 84.50 = B	69.49 - 63.50 = D+	
84.49 - 79.50 = B-	63.49 - 59.50 = D	

Make-Ups:

Any assignment missed can be obtained from the instructor. Lab work may be made up during free lab time within a week of the missed assignment if the lab is available. Unit tests can only be made up by special arrangement with the instructor. Makeup tests will be granted on an individual basis only following a conference with the instructor, where the reason(s) for missing the test must be determined mitigating circumstances beyond the control of the student such as, illness, death in the family, or change in condition of employment. If two unit tests are missed during the semester and/or if the final exam is missed the student will receive a "F" grade if he or she is failing other parts of the course or an "I" if the student is passing all other parts of the course.

Cellular Phones and/or beepers: *Cellular phones and beepers are only allowed in class or lab if they are turned off or in silent mode. Under no circumstances are phones to be answered in class. When there are extenuating circumstances that require that a student be available by phone or beeper, that student must speak to the instructor prior to class, so that together they can arrive at an agreement.*

Course Objectives: CHE*K122- General Chemistry II

1. The student will learn about the factors which affect the rate of chemical reaction.
2. The student will be able to write a rate law.
3. The student will understand the meaning of reaction order.
4. The student will learn how to calculate the half-life for a reactant.
5. The student will be able to understand the meaning of activation energy.
6. The student will learn about different types of catalysts and how they function.
7. The student will be able to calculate the instantaneous and the average reaction rate.
8. The student will be able to understand the concept of reaction mechanism.
9. The student will be able to define enzymes and understand basic enzyme catalysis.
10. The student will be able to define chemical equilibrium.
11. The student will learn how to write an equilibrium expression.
12. The student will learn how to interpret the equilibrium constant.
13. The student will be able to understand the relationship between kinetics and equilibrium.
14. The student will learn how to calculate equilibrium concentrations of reactants and products.
15. The student will understand LeChatelier's principle and factors which affect equilibrium.
16. The student will learn the definitions of acids and bases.
17. The student will learn how to determine the strength of acids and bases.
18. The student will be able to define pH and calculate the pH of acid or base solutions.
19. The student will be able to understand weak acids and the acid ionization constant.
20. The student will learn how to calculate the pH of a weak acid or base solution.
21. The student will be able to understand the concept of Lewis acids and bases.
22. The student will learn how to determine the acid-base properties of salts.
23. The student will be able to understand how titrations are used to quantitate acids and bases.
24. The student will learn how acid-base indicators are used.
25. The student will be able to define a buffer and learn how buffers work.
26. The student will learn how to use the Henderson-Hasselbalch equation.
27. The student will be able to understand the concept of solubility equilibria.
28. The student will learn the definition of the solubility product, K_{sp} .
29. The student will be able to understand the common ion effect.
30. The student will be able to understand the laws of thermodynamics.
31. The student will be able to differentiate spontaneous from nonspontaneous processes.
32. The student will be able to define entropy.
33. The student will be able to understand the concept of free energy.
34. The student will learn how to predict spontaneity based on the free energy change, ΔG .
35. The student will learn about the relationship between the equilibrium constant and free energy.
36. The student will be able to understand the relationship between enthalpy, entropy and free energy.
37. The student will be able to understand how equilibrium and free energy are central to living systems.
38. The student will learn how to balance redox equations.
39. The student will be able to understand the basics of galvanic cells.

40. The student will learn the significance of standard reduction potentials.
41. The student will be able to write half-cell reactions.
42. The student will be able to understand the thermodynamics of redox reactions.
43. The student will be able to define the Faraday constant.
44. The student will learn how to use the Nernst equation.
45. The student will be able to understand how batteries work.
46. The student will learn how an electrolytic cell works.
47. The student will be able to understand corrosion of metals.
48. The student will learn the basics of atmospheric chemistry.
49. The student will be able to understand the phenomenon of acid rain.
50. The student will be able to understand the greenhouse effect.
51. The student will be able to understand various aspects of environmental chemistry including smog.
52. The student will learn the definition of a coordination compound.
53. The student will be able to define coordination number, ligand, and chelating agent.
54. The student will learn the basic nomenclature of coordination compounds.
55. The student will be able to understand the bonding in coordination complexes.
56. The student will learn how coordination chemistry applies to biological systems.
57. The student will learn the basic nomenclature of organic compounds.
58. The student will be able to distinguish between types of organic compounds.
59. The student will be able to define and differentiate between geometric, optical and regioisomers.
60. The student will be able to predict the physical and chemical properties of various organic compounds.
61. The student will be able to differentiate between the different types of nuclear particles.
62. The student will be able to understand the fundamentals of nuclear reactions.
63. The student will be able to understand the basis of nuclear stability.
64. The student will be able to write and balance nuclear equations.
65. The student will learn the definition of nuclear binding energy.
66. The student will be able to understand natural radioactivity and half-life of radioactive decay.
67. The student will be able to understand the concept of nuclear transmutation.
68. The student will be able to understand the concept of nuclear fission.
69. The student will learn how radioactive isotopes are used in biology and medicine.
70. The student will learn about the chemistry of metals and nonmetals in greater detail.

Course Outline: CHE*K122- General Chemistry II

UNIT 1

I. Chemical Kinetics

A. Reaction Rate

1. factors affecting reaction rate
2. measuring reaction rates
 - a. instantaneous rate
 - b. average rate
 - c. rate constants
3. rate law
4. reaction order
5. half-life

B. Activation Energy and Collision Theory

1. transition state
2. Arrhenius equation for determining E_{act}

C. Reaction Mechanism

1. elementary steps
2. rate-determining step
3. reaction intermediates
4. molecularity
 - a. unimolecular, bimolecular and termolecular reactions

D. Catalysts

1. homogeneous catalysts
 - a. enzymes
2. heterogeneous catalysts
 - a. Haber process
 - b. catalytic converters
 - c. catalytic hydrogenation

II. Chemical Equilibrium

A. Law of Mass Action

1. Equilibrium Constant

C. Equilibrium Expressions

1. homogeneous equilibria
2. heterogeneous equilibria
3. K_c vs. K_p
4. multiple equilibria

D. Relationship between Kinetics and Equilibrium

E. Reaction Quotient, Q_c

F. LeChatelier's Principle

1. factors affecting equilibrium

UNIT 2

- I. Acids and Bases
 - A. Definitions/Theories
 - 1. Arrhenius
 - a. hydronium ion
 - 2. Bronsted-Lowry
 - a. conjugate acid-base pairs
 - 3. Lewis
 - B. Properties of Acids and Bases
 - C. Ion Product of Water
 - 1. K_w
 - 2. pH, pOH
 - D. Strengths of Acids and Bases
 - 1. acid ionization constant K_a ; percent ionization
 - 2. monoprotic, diprotic, polyprotic acids
 - 3. molecular structure and acid strength
 - E. Acid-Base Properties of Salts
 - F. Acid-Base Properties of Oxides and Hydroxides
 - 1. acidic and basic oxides
 - 2. basic and amphoteric hydroxides
 - G. Organic Acids and Bases
 - 1. carboxylic acids
 - 2. amines
- II. Acid-Base Equilibria
 - A. Common Ion Effect
 - 1. Henderson-Hasselbalch equation
 - 2. pKa
 - B. Buffers
 - 1. importance in biological systems
 - C. Acid-Base Titrations
 - 1. strong acid-strong base
 - 2. strong acid-weak base
 - 3. weak acid-strong base
 - 4. indicators
- III. Solubility Equilibria
 - A. Solubility Product
 - 1. K_{sp}
 - 2. ion product, Q
 - 3. solubility
 - 4. molar solubility
 - B. Precipitation Reactions
 - 1. fractional precipitation
 - 2. qualitative analysis
 - C. Factors Affecting Solubility
 - 1. common ion effect

- 2. pH effect
- D. Complex Ions

UNIT 3

- I. Second Law of Thermodynamics
 - A. Entropy
 - 1. spontaneous processes
 - 2. microstates
 - 3. standard entropy
 - 4. relationship between ΔS and ΔH
- II. Third Law of Thermodynamics
 - A. Absolute Entropy
 - B. Gibbs Free Energy (G)
 - 1. standard free energy change, ΔG°
 - 2. relationship between ΔG , ΔS and ΔH
 - a. predicting the sign of ΔG
- III. Free Energy and Equilibrium
 - A. $\Delta G = -RT \ln K$
 - B. Application of Thermodynamics in Biological Systems
 - 1. glycolysis
 - 2. biosynthesis
- IV. Electrochemistry
 - A. Oxidation-Reduction Reactions
 - 1. balancing redox equations
 - B. Galvanic Cells
 - 1. anode, cathode
 - 2. half-cell reactions
 - 3. cell potential or emf
 - 4. Daniel cell
 - 5. standard reduction potentials
 - C. Thermodynamics of Redox Reactions
 - 1. relationship between E_{cell} , ΔG and K
 - D. Effect of Concentration on E_{cell}
 - 1. Nernst equation
 - E. Batteries
 - 1. dry cell battery
 - 2. mercury battery
 - 3. lithium ion battery
 - 4. lead storage battery
 - F. Fuel Cells
 - G. Corrosion
 - H. Electrolytic Cells and Electrolysis
- V. Environmental Chemistry
 - A. Chemistry of the Atmosphere
 - 1. troposphere, stratosphere, mesosphere, ionosphere (thermosphere)

- 2. nitrogen cycle
 - 3. oxygen cycle
 - 4. ozone
 - 5. CFC's
 - B. Volcanoes
 - C. Greenhouse Effect
 - 1. greenhouse gases
 - D. Acid Rain
 - E. Smog and Emissions
 - F. Water
 - G. Alternative Fuels
- VI. Chemistry of Nonmetals
- A. Carbon, Nitrogen, Oxygen, Sulfur, Phosphorus and the Halides

UNIT 4

- I. Chemistry of Metals
- A. Sources/Production
 - 1. minerals
 - 2. ores
 - 3. alloys
 - B. Band Theory
 - 1. conductors and semiconductors
- II. Transition Metal Chemistry
- B. Electron Configurations
 - C. Coordination Chemistry
 - 1. coordination number
 - 2. donor atom
 - 3. ligand
 - 4. chelating agent
 - 2. nomenclature
 - 3. structure
 - 4. isomerism
 - a. geometric isomers, optical isomers, chirality
 - 5. bonding
 - a. crystal field theory
 - 6. reactivity
 - 7. applications of coordination chemistry
 - a. industrial
 - b. biological
- III. Organic Chemistry
- A. Classes of Compounds/Nomenclature
 - 1. aliphatic hydrocarbons
 - a. alkanes, alkenes, alkynes, alicyclic hydrocarbons

- 2. aromatic hydrocarbons
 - a. benzene and related compounds
- B. Functional Groups
 - 1. alcohols
 - 2. carboxylic acids
 - 3. amines
 - 4. amides
 - 5. aldehydes
 - 6. ketones
 - 7. esters
 - 8. ethers
- C. Physical and Chemical Properties
 - 1. mp, bp, solubility
 - 2. reactivity
- D. Isomers
 - 1. cis/trans isomers
 - 2. regioisomers
 - 3. optical isomers and chirality
- IV. Nuclear Chemistry
 - A. Subatomic Particles
 - 1. protons, neutrons, electrons
 - 2. beta particles, alpha particles, positrons
 - B. Fundamentals of Nuclear Reactions
 - 1. radioactive decay
 - 2. nuclear transmutation
 - 3. conservation of atomic number
 - 4. conservation of mass number
 - C. Nuclear Stability
 - 1. belt of stability
 - 2. nuclear binding energy
 - D. Kinetics of Radioactive Decay
 - 1. half-life
 - 2. radiocarbon dating
 - E. Nuclear Fission
 - 1. critical mass
 - 2. nuclear chain reaction
 - 3. nuclear reactors
 - F. Uses of Radioisotopes
 - 1. mechanistic studies
 - 2. biology and medicine

CHE*K122 General Chemistry II Tentative Academic Schedule Spring 2012

10623 Lecture: MW 11:00 a.m.-12:20 p.m. D210

10624 Lab: F 9:00 a.m.-12:00 p.m. B222

week 1

F-Jan 20 LAB: Syllabus, Orientation, Lab Safety and Procedures; Review.

week 2

M-Jan 23 Kinetics Ch 13 Problems: 6, 15, 16, 26, 37, 43, 45, 51, 65, 100.

W-Jan 25 Kinetics Ch 13 cont'd.

F-Jan 27 *Exp #1: Kinetics I- Iodination of Acetone.*

week 3

M-Jan 30 Kinetics Ch 13 cont'd.

W-Feb 1 Kinetics Ch 13 cont'd/Equilibrium Ch 14 Problems Ch 14: 8, 14, 20, 24, 26, 42, 54, 55, 64, 88.

F-Feb 3 *Exp #2: Kinetics II- The Iodine Clock Reaction.*

week 4

M-Feb 6 Equilibrium Ch 14 cont'd.

W-Feb 8 Equilibrium Ch 14 cont'd.

F-Feb 10 *Exp #3: Chemical Equilibrium.*

week 5

M-Feb 13 Equilibrium Ch 14 cont'd.

W-Feb 15 **UNIT TEST 1 (Ch 13, 14).**

F-Feb 17 *Exp #4: Aspirin: Synthesis and Melting Point Determination.*

week 6

M-Feb 20 **Presidents' Day- class does not meet**

W-Feb 22 Acids and Bases Ch 15/24. Problems (Ch 15): 5, 25, 36, 42, 48, 53, 56, 68, 70, 74, 76, 79, 80, 83.

F-Feb 24 *Exp #5: Determination of Vitamin C in Fruit Juice.*

week 7

M-Feb 27 Acids and Bases Ch 15, 24 cont'd.

W- Feb 29 Acids and Bases Ch 15, 24 cont'd/Acid-Base Equilibria, Solubility Equilibria Ch 16. Problems: 10, 14, 15, 16, 28, 31, 32, 50, 54, 55, 62, 76.

F-Mar 2 **LAB MIDTERM (exps 1-5)**

week 8

M-Mar 5 Acid-Base Equilibria, Solubility Equilibria Ch 16 cont'd.

W-Mar 7 Acid-Base Equilibria, Solubility Equilibria Ch 16 cont'd.

F-Mar 9 *Exp #6: pH and Buffers.*

week 9

M-Mar 12 Ch 15, 24, 16 review.
 W-Mar 14 **UNIT TEST 2 (Ch 15/24, 16)**
 F-Mar 16 *Exp #7: Water Hardness Titration.*

week 10 **SPRING BREAK (Mar 19-23)**

week 11

M-Mar 26 Entropy, Free Energy and Equilibrium Ch 18. Problems: 5, 12, 14, 18, 28, 35, 68.
 W-Mar 28 Entropy, Free Energy and Equilibrium Ch 18 cont'd.
 F-Mar 30 *Exp #8: Molar Solubility and K_{sp} .*

week 12

M-Apr 2 Entropy, Free Energy and Equilibrium Ch 18 cont'd/ Electrochemistry Ch 19. Problems: 2, 12, 16, 22, 29, 32, 57.
 W-Apr 4 Electrochemistry Ch 19 cont'd.
 F-Apr 6 **SPRING RECESS**

week 13

M-Apr 9 Electrochemistry Ch 19 cont'd.
 W-Apr 11 Chemistry in the Atmosphere/Chemistry of Nonmetals Ch 17, 21. Problems: 17.40, 17.66, 21.76.
 F-Apr 13 *Exp #9: Determination of Iron by Redox Titration.*

week 14

M-Apr 16 Chemistry in the Atmosphere/Chemistry of Nonmetals Ch 17, 21 cont'd.
 W-Apr 18 **UNIT TEST 3 (Ch 17, 18, 19, 21).**
 F-Apr 20 *Exp #10: Thin-Layer Chromatography.*

week 15

M-Apr 23 Chemistry of Metals Ch 20, 22. Problems: 20.16, 22.16, 22.18, 22.26, 22.35.
 W-Apr 25 Chemistry of Metals Ch 20, 22 cont'd.
 F-Apr 27 *Exp #11: Analysis of Sugars by Optical Rotation.*

week 16

M-Apr 30 Organic Chemistry Ch 24. Problems: 14, 25, 36, 56, 60, 66.
 W-May 2 Organic Chemistry Ch 24 cont'd.
 F-May 4 **LAB FINAL (exps 6-11)**

week 17

M-May 7 Organic Chemistry Ch 24/Nuclear Chemistry Ch 23. Problems: 6, 24, 26, 28, 34, 54, 57, 58.
 W-May 9 Nuclear Chemistry Ch 23 cont'd.
 F-May 11 Review

week 18

M-May 14 **UNIT TEST 4 (Ch 20, 22, 23, 24).**
