I. Course Description

Sociology is the study of groups, organizations, institutions, and societies, and their influences on human behavior. Sociology goes beyond individual and psychological explanations of human behavior to look at social factors and trends that shape individual behavior and the behavior of groups and societies. These social trends and factors include cultural aspects of societies, such as beliefs, values, and social norms. They also include structural aspects of societies, which refers to the positions and roles people occupy in groups, institutions, and societies as a whole. In particular, sociology focuses on patterns of social inequality, especially class, racial and ethnic, and gender inequality, and the way they influence how we think and act both individually and collectively. Overall, sociology allows us to analyze societies and social behavior from a critical perspective, thereby providing us with a better understanding of social problems and issues.

The course is divided into three parts, with an exam after each part. The first part of the course will examine how sociologists study the social world. This will discuss the idea of sociology as a science, the research methods used by sociologists to study the social world, and theoretical perspectives on society and social behavior. The second part of the course will explore the sociological concepts of culture and social structure. In terms of culture, we will look at issues such as culture and socialization, deviance, crime, and social control. In terms of social structure, we will examine concepts such as statuses and roles, groups and organizations, total institutions, and community. The final part of the course will study social inequality, including class inequality, racial and ethnic inequality, and gender inequality. Along the way, students will also be introduced to various prominent theorists in the history of sociology, such as Marx, Durkheim, Weber, Parsons, and Goffman.

II. Learning Outcomes

After successfully completing the course, a student should have the following skills and knowledge:

- An understanding of the sociological perspective
- An understanding of different research methods used in sociological research
- An understanding of different theoretical perspectives used in sociology
- An appreciation of the role of social factors in influencing individual behavior
- The ability to think about society from a critical perspective, especially how social positions in society shape how people think and act
- An understanding of inequalities in our society and their consequences for both dominant and subordinate groups
- A knowledge of major figures in the history of sociology

III. Course Readings

Assigned readings are to be done before coming to class. Discussion of the readings in class will be a significant part of your class participation grade. The required texts for the class are:

- Susan J. Ferguson, *Mapping the Social Landscape: Reading in Sociology, 5th Edition*. McGraw Hill, 2005.
- Lisa J. McIntyre, *The Practical Skeptic: Core Concepts in Sociology, 4th Edition*. McGraw Hill, 2008.

IV. Course Assignments and Evaluation

Course grades will be based on two assignments, a research paper or service learning project, and three take-home exams:

- The two assignments will each count for 10% of the final grade.
- The research paper or service learning project will count for 20% of the final grade.
- The first exam will count for 15% of the final grade, the second exam will count for 20% of the final grade, and the third exam will count for 25% of the final grade. The third exam will be your final exam, although it will not be a cumulative exam.

All assignments and exams involve written work, and poor quality writing, including poor spelling and grammar, will negatively affect your grade. At a minimum, you should spell check all work before it is submitted. If you want assistance with your writing skills, I strongly urge you to visit The Writing Center in room 106 on the Mohegan campus.

All exams and assignments must be typed. Late work will be penalized accordingly. Assignments and exams submitted by email without permission will also be penalized. Failure to complete assignments and/or exams will hurt your final grade more than submitted work that receives an F but reflects some level of effort.

Class participation will help boost your final GPA for the course.

V. Cell Phone Policy

Students are notified that cellular phones and beepers are allowed in class or in the Learning Resource Center only if they are turned off or turned to a silent mode. Under no circumstances are phones to be answered in class. When there are extenuating circumstances that require that a student be available by phone or beeper, the student should speak to the instructor prior to class, so that together they can arrive at an agreement.
